... if future plans require it ...

here's how **you** can <u>cut costs</u> and make larger parts or products faster

Examine the time-awing steps offered by PLASTICS: Advances in plastics technology—particularly in polytryrme—have placed plastics first in many manufacturers' plans. With improved polystyrene formulations, new molding techniques and machinery, you can make larger arra moldings in one piece . . . many with complicated and intrinset designs.

You can cut production time with these new moldings because you can eliminate many assembly steps and speed your production cycle. And your product quality may be improved, too, because polystyrene won't chip, peel or rust! Polystyrene comes in a wide range of colors . . . colors built right into this famous plastic. This means you can keep your finishing operations to a minimum.

Dow, as a leader in the plastics industry, offers you a complete line of quality controlled polystyrene plastics under the trade mark name, Styron, plus the expert assistance of Dow's Plastics Technical Service. When looking at the shape of things to come in '51, be sure to include Styron in your planning for future civilian or defense products. Write Dow today.

LETTERS

Artzybasheff & the Pentagon

Americans everywhere, I am sure, will be highly fascinated by Artist Artzybasheff's cover picture of the Pentagon [July 2].

This fascination will center about the illustration of the two loose ends of the red tape shown encircling the Pentagonian figure. We never knew that there was even one

end to that red tape—much less two.

RICHARD J. DILLON Madison, Wis.

It is assumed that the decorations represent the U.S. Marine Corps COMMANDER CHARLES F. HOYT

Pearl Harbor

Whether purposely or not, Artist Artzybasheff shows the arm of the Navy as being the only one on top of, not bound up in red tape.

D. R. WHITNEY Portland, Ore.

I can understand its four stars-might even command pilot's wings for its flights of fancy. I can even understand its theater ribbons, though the W.W. I is far-fetched, its not even having been born then. But why the Purple Heart? When was the Pentagon wounded?

Cleveland Heights, Ohio

I Trace's Pentagon is not wearing the Purple Heart but the Legion of Merit -which should have been put after the Silver Star instead of ahead of it .- ED.

Not Responsible

In the Time article (June 18), you stated that we had cut off the lights and water in the President's house. This is untrue. I simply notified the utility companies that we would not be responsible for the account after June 30, but that Dr. Wagner could continue to receive the service on his own account if he wished, which, by the way, he did.

JOHN TIEDKE

Do your eyes need help?

MANY PEOPLE—both young and old —have some degree of sight impairment. According to recent estimates, one out of every five children of school age has faulty vision. Among adults over 40, two out of every three have visual defects.

To help maintain good vision throughout life and protect general health, doctors recommend that everyone follow the safeguards below,

The child's eyes . . .

During the formative years, authorities say that the eyes need careful attention. The eye grows and changes during this period and it is necessary to discover any serious abnormality early. Faulty visual habits are often formed during childhood which may lead to defects in later years when correction may be more difficult.

Authorities also say that a child's eyes should be examined at age three or four, again before entering school and after starting to read. They recommend these examinations even though no signs of eye trouble are evident.

There are many common diseases that affect the eyes of children. Most of them are mild—but some may be serious. Both may start in the same way—with redness, flow of tears, blinking, squinting, or scowling, accompanied by little or no pain. So, if these or other signs of eye trouble appear, it is wise to see a doctor.

Specialists caution against delay in the use of glasses if a child needs them. Glasses generally help the child to improve his vision, or overcome other eye defects—often within a relatively short

The adult's eyes . . .

After age 40, periodic examinations of the eyes are especially important. They provide a double safeguard. First, by discovering defects and diseases of the eye itself. Second, by helping to detect conditions such as high blood pressure, disabetes, and hardening of the arteries which often reveal themselves by changes in the eyes.

Fortunately, more can be done today than ever before to check or cure some of the more serious eye conditions. New drugs, for example, are remarkably effective against eye infections. Improved surgical techniques have likewise helped doctors to prevent loss of vision in cases of cateract, and in conditions affecting the retina, the vital "seeing" part of the eye.

Three common eye defects—nearsightedness, farsightedness, and astigmatism—can usually be corrected by properly fitted glasses. Only an eye specialist is qualified to prescribe glasses or other special eye treatments.

Under proper medical care, most of the threats to good vision can be corrected or cured so that the eyes may be used efficiently throughout life.

To help keep the eyes in good condition:

Read with a clear, good light falling from above and behind you.

2. Rest your eyes at frequent intervals when reading or doing close work.

3. Except for easily removable particles, trust only to expert help for removing a foreign body from the eye. 4. Be alert to the warnings of eye trouble — headaches, eye fatigue, blurred vision, inflammation of the eyes or lids, spots before the eyes and colored halos around light.

5. Use eye safety devices exactly according to instructions.

Have your eyes examined regularly by an eye specialist.

Sir:
Your Science article [Time, June 25] on the work of Humason and the red-shift of the nebular spectra is excellent and is interestingly written. However, the story tends to give an inaccurate idea by saying that this effect was "first discovered by Hubble . . . and that on it he based his startling theory of the expanding universe." In reality, I be-lieve you will find that the red-shift was first observed by V. M. Slipher of Lowell Observatory. Hubble, however, was the one to notice the law connecting the amount of the shift and the distance of the nebulae.

DR. IRA M. FREEMAN Department of Natural Sciences, UNESCO

. Is it not true that the theory of

the "expanding universe," or "exploding universe," was developed by Abbé G. Lemaître, L. V. DEGNAN

San Francisco

I There had been many mathematical theories suggesting the possibility of an expanding universe, but Hubble's law gave the first firm evidence from observed data.-ED.

Great Hope

In the June 25 issue of Time, your maga-zine [refers to] "... crag-faced Republican Hugh Roy Cullen (who hoped MacArthur

would run for President) . . ."

I never told anyone, as your magazine stated, that I hoped General MacArthur would run for President. Nor did I discuss any political matters with the general while in New York or while in Texas. The fact of in New York or while in Texas. The fact of the matter is I have a great hope that we will have peace and that I will have an oppor-tunity to work and vote for General Ike Eisenhower for President; for it is my belief that he has the respect of nearly all of our citizens in both the Democratic and Repub-

ADVERTISING DIRECTOR

Dear Time-Reader

The "TIME iinx" cry is on again. Sugar Ray Robinson, it says, was voodooed out of his world middleweight crown last week (see Sport) by

his picture on the June 25 TIME cover. Some sport columnists had chanted

the hex legend earlier, when Robinson took a "no decision" in his Berlin fight three days after the

cover was published, The legend, started long ago, snowballed from a few sport covers whose subjects ran into misfortune, Examples:

Joe DiMoggio (July 13, 1936), spec-tacular rookie, played with the American League All-

Stars the week his came out, made no hits in five times up, fumbled two ground balls, Score: National League 4; American League 3. (The jinx, if jinx it was, did not seem to bother Di-Maggio's playing from that point on.) Tom Harmon

1939), Michigan's All-Amerback, made but one touchdown the next Saturday, while mediocre Illinois stopped him for one of the season's biggest upsets. Score:

Illinois 16; Michigan 7. Elizabeth Arden Graham (May 6, 1946), owner of Kentucky Derby favorites Knockdown and Lord Boswell, lost her Arlington Park (Ill.) stable in the worst fire of horse-racing history—on the same day that TIME's story on her hit the newsstands. Two days later her Derby entries finished out of the money.

Leo Durocher (April 14, 1947), then baseball's highest-paid manager, was sus-pended for the entire season a day before cher's luck nowadays is better than that of the Commissioner who booted him.)

Ben Hogon (Jan. 10, 1949), 1948's golfer of the year and favorite for most week of the cover and three weeks later suffered a near-fatal accident in his car. (Hogan's subsequent comeback is one of the great sport stories of the decade.)

Less remembered are the covers that worked out as four-leaf clovers for the people they featured. Among the 17 sport covers since World War !!, 12

seem to have brought at least as much good luck as bad.

Glen Davis and Doc Blanchard (Nov. 12, 1945), Army's Mr. Inside and Mr. Outside, romped over Notre Dame the week of the cover. Score: 48-0. Then they charged through the rest of their second

Pauline Betz (Sept. 2, 1946), top woman tennis player, lost only one set in seven matches while winning the U.S. Women's Singles Championship in the week of the

Frank Leohy (Oct. 14, 1946), Notre Dame football coach, had just started a no-loss streak that lasted four years.

Bob Chappuis (Nov. 3, 1947), flashy Michigan half-back, tossed the pass that set up the winning touchdown against Illinois the Saturday after the cover appeared. His play for the rest of the season, while helping Michigan take the Big 10

while helping surringan take the mg to title, made him one of the two men to rate all four Major All Amer-ica teams. Then he set a Rose Bowl record by passing and running 279 yards. Ben Jones (May 30, 1949) was the leading U.S. trainer whose horse Citation went

whose horse Citation went on that year to win the Triple Crown for Calumet Farm. With Jones still top trainer, Citation last week became the first thoroughbred to pass the million-dollar mark in earnings (see

The TIME jinx legend is something like the old baseball taboo-never, before

the last out is called, tell the man on the mound that he is pitching a no-hit game (as if he didn't know it). If anybody gets a single, the informant is accused of jinxing the pitcher. Not only sports figures, but many oth-

er top news personalities (such as politicians, businessmen and generals) are engaged in highly competitive enterprises.

They may, like Thomas Dewey, two weeks after an October 1944 cover, get knocked out of the box. They may, like Marshal Stalin after eight different cover portraits, keep right on throwing the same old curves. Win, lose, or draw, they are news.

NATIONAL AFFAIRS

THE NATION

Soldier's Talk

The statesman of the week was a trench-coated soldier with a hand grenade taped to his shoulder harness. Almost from the moment the truce talks started in 'neutral' Kaesong, General Matt Ridgway had chafed under a sense of an intolerable situation. The choice was to accept a long-drawn-out negotiation and daily humillation, or to force a showdown.

The issue came to its sticking point on a dit road to Kaesiong, where Communist soldiers with Tommy gans halted a U.N. convoy because it included a truckload of convoy because it included a truckload of the convoy because it included a truckload of the convoy because the convoyable of the convoyable

On his own initiative, Ridgway ordered talks suspended, and laid down his conditions. Washington backed up his decision.

It was the kind of talk that Americans approved and understood. Apparently, Communists understood it too. After three days of bluster, the Communists backed down, When the talking began again, Kaesong was truly a neutral city. Reported the U.N. delegates of the new truce discussions: "Some progress was made,"

THE PRESIDENCY Family at Home

A few minutes before the 6:40 New York train was due, the President's limousine, followed by a car loaded with Secret Service men, nosed into Washington's high-vaulted Union Station. Iron gates leading to the platform were slammed shut; passengers for 7 o'clock trains had to wait until after 7 before they were

admitted to the platform.

Margaret Truman, back home from Euröpe, stayed in her drawing room until passengers aboard her car had left. Then she came bounding down into the Preislent's arms and was soundly bussed. Bees Truman, who had met Margaret's ship in New York, followed and got a butshondly man herded his women lok into his limousine and whisked off to Blaif house size and whisked off to Blaif house.

The President had mustered up all the

RIDGWAY
Communists understood, too.

power of his office to make their return to Washington a private affair. He complains often and bitterly about the intrusions of the presidency on his family life. Democrats who argue that the President will not run again in 1932 base their hunch principally on Bess Truman's well-known antipathy to life in a goldfish bowl.

U.S. WAR CASUALTIES The Defense Department last week

reported 607 more U.S. casualties in Korea, the fewest in six weeks. The list brought total U.S. losses in more than a year of war to 77,390. The breakdown:

DEAD .									13,176
WOUND	DED		,			,			53,412
									10,644
CAPTU	REE						,		158

Total casualties by services: Army, 63,124; Marine Corps, 12,709; Navy, 907; Air Force, 650.

Ain't Saying

The subject of Harry Truman's 1952 intentions came up again at his weekly press conference. The President wasn't saying, just acting deliberately mysterious. It has become an unprofitable line of inquiry and a stale joke, but both sides went through with it.

What about General Eisenhower's plans, then? the President was asked, When Ike was appointed to SHAPE, was there any understanding as to how long the job would last? The President flushed slightly and said there was not. Is the general a Democrat or Republican? Grinning archly, the President suggested that the best way to find out would be to ask the general himself, "You told us at one time that you took Eisenhower at his word when he said he would never run for President . . . a reporter began. The President, breaking in abruptly, told the reporter not to use the word "never." Eisenhower had told him in January 1948 that he would not run for President in 1948; that was as far as the President went; he had not discussed politics with Eisenhower since.*

A visiting reporter for the Mason (Ga.) Clegraph, with a great show of innocence and a grits-and-gravy drawl, said: "Mr. Fresident, this is my fart conference. My formation of the said of the said of the said lot younger than I though you did." The President rocked back on his heles and let out a real belly laugh. The Southerner pressed his advantage quickly, "Would when you first hearne President?" Still Jaughing, the President said proud-

by that he was, He was still young enough to make a good race, he said. Then he paused deliberately, and added coyly that he meant a foot race.

THE CONGRESS

"What Are You Trying to Do?"

Usher L. Burdick of North Dakota draped his huge 72-year-old frame over the reading stand in the House of Representatives and fixed a jaundiced eye on his colleagues. He was irked by continuing criticisms of U.S. farmers. He was disgusted

* Not the way the transcript reads for a presconference Dec. 22, 2404, more than a year free the 1948 election. The President was asked: "Do you feel sure that he [Ike] is not a candidate for 192 as he was not in 1948?" The President replied that General Eisenhower had sald so, and his word was good. by the bitter debate on economic controls. When I hear some Sears & Roebuck pistol-toting cowboy from Brooklyn insinuate how the Government has tailed up the farmer at the expense of all the rest of the people," said Republican Burdick, "it does not set well with me . . . You complain against the beef men. I am one of them . . . I am willing to take a loss on my cattle, and it means \$8,000 loss to me on the one rollback. I am willing to stand for that if it will help the entire country . . . If I was concerned only with my own interests, I would vote against this control bill, but I am interested in the welfare of the whole United States. I do not think these controls will do much controlling . . . I am not willing, however, to deny the Administration the means of stopping rising prices if it believes that can be done."

Congressman Burdick's contention was that farmer, factory worker, industrialist, consumer, are all in the same boat; inflation may wreck all of them. Hence, he was going to vote for the Administration's bill. Usher Burdick shouted at his colleagues: "What are you trying to do?" He shook his head, bellowed a parting shot: "Well, I will be damned if I know," and marched

back to his seat.

Con't Work with Hondeufft. The House signed and guilawed appreciatively for two full minutes. Then, with hundreds to the first two full minutes. Then, with hundreds the control of the two full minutes are the first tw

The Administration continued to protest, Chief Mobilizer Charles Wilson went on the air to warn: "I cannot work effectively with the handcuffs the pressure groups are forging for me now." And Mr. Truman made the gesture of inviting the country's top labor leaders to Blair House, there to promise them that he would go on fighting, and to ask them to help him out. But there was little the labor men could do -except threaten to ask for higher wages the minute the new control bill is passedand Mr. Truman knew it, Labor leaders had tried to talk up a letter-writing campaign among their rank & file, but no one listened. They suggested that the President might veto the bill. But he only turned a "poker face" to the suggestion, one of the conferees later mournfully reported. Mr. Truman was licked on the bill.

Silence from All Over. Having lost already, the Administration Democratis turned to a simple strategy. It was to let the coalition of Republicans and Southern Democrats (whom the Trumanites will carefully tag as "Disicerats," not Democratis) go on wrecking the White House's bill, but to demand roll calls—from 15 to 2c on the final day—on every major amendment. Then, if prices soar, the vill—

CONGRESSMAN BURDICK
"It does not set well with me."

lains may be easily pointed out to the voters. As laid out last week, it was a plea in political plankruptcy—an argument that the party which can't even run its own Congress is not evil, just infefectual—but it was the best that the Democrats could think up. They had waited for the country to come to their aid with a barrage of mail, but the silence was deafening.

Long Way to Go

Massachusetts' Senator Henry Cabot Lodge Jr., who served as an armored force major in Libya in 1942 and knows how it feels to fight without air superiority, stepped into a Senate hearing room last week and fired off another broadside

CHIEF JUSTICE VINSON
"The happiest day of my life."

(TIME, May 7) in the battle for a bigger Air Force. What Lodge wants is a combatready Air Force of 150 groups.

For two hours, behind closed doors, Lodge spelled out his plan. Under the present program for a 95-group Air Force, he said, the U.S. will be able to muster only one-third of the tactical aviation it would need to repel an invasion of Western Europe. The U.S., he argued, needs a minimum of 50 full tactical air groups for ground support, 38 interceptor groups for home defense, and 62 groups of long-range strategic bombers, plus fleets of heavy transports. Such an aerial armada would take three years to build, and cost a staggering \$96 billion, more than the entire U.S. budget for 1951. To win World War II, he reminded the Senators, the U.S. had an air force of 243 groups. Obviously, Lodge had influential help in

his homework. Next to him at the green committee table sat Air Force Secretary Thomas K. Finletter, who is committed to the Administration's 95-group limit. He has not officially urged a 150 group Air Force, but if anyone should ask Finletter.

he is behind the idea 100%.

Actually, the Air Force has a long way to go before it can count even 95 combatready groups. Just how far came out last week in testimony at a House Armed Services Committee hearing. There, prodded by the committee, an Air Force general confessed that the U.S. has exactly 147 giant, ten-engined B-36s, the intercontinental A-bomb carrier which the Air Force ballyhoos as the nation's biggest deterrent to the Russians. Of the 147, only 87 are in condition to fly; the other 60 are squatting in factories, undergoing a \$2,500,000 modernization job. New ones are rolling off production lines at a snail'space five per month.

When a blab-mouthed Congressman leaked this news to the press, the Air Force let out an anguished cry. For months it has been shifting the big planes from base to base, doing all it could to make its handful of B-36s look like a mighty fleet. Even some Congressmen were shocked by the leak. Said Senator Dick Russell, who presided over the MacArthur hearing and "It is difficult to conceive of such utter lack of responsibility..., [This] might well be the cause of World War III."

POLITICAL NOTES

Home-Town Boy

It was "Fred Vision Day" in the valley town of Louiss, Ky. (pop. 2,100), and 5,000 people crowded into town for the doines. U.S. Supreme Court Justice Stanley Reed, Tom Clark and Sherman Mingley, the standard Sherman Mingley, the powermors of Kentucky and nearby West Virginia were there to honor the home-town boy. They at country ham and fried chicken as guests of cousin the cremony at which a bronze plaque, bearing Chief Justice Vinson's mournfully dignified likeness, was dedicated. "The

happiest day of my life," said Vinson.* Said a whiskered old mountaineer: "For a feller who started life in jail, Fred sure

has gone a long way."†

He sure had, Frederick Moore Vinson had solemnly mounted the Washington ladder-Congressman, U.S. court of appeals Judge, U.S. Economic Stabilizer, Director of War Mobilization and Reconversion, Secretary of the Treasury and then Chief Justice-lately with a helping hand from his good friend Harry Truman. The question now: How much further will Fred Vinson go, with Harry Truman's help? White House Democrats, who don't really know what the boss's plans are (as of last week they thought he probably wouldn't run again), think that Harry Truman, if he does not run, will designate Vinson as his successor. Vinson is a pokerplaying, Williamsburg-weekending pal of the President's, and regularly gives the President advice on appointments and legislation-a practice that might have horrified some of his predecessors as Chief Justice. Besides, he is conservative enough, regular enough, and close enough to the South to enjoy the respect of Southern respect for Harry Truman and spend their hours thinking up ways to thwart the President. Harry Truman licked the Dixiecrats in 1948, but the Southern Democrats now arrayed against him are a more influential and formidable lot.

A Kick for the Senator

Harry Truman, who can scarcely afford to lose supporters, gave one a kick in the political shins last week. The wounded man: Illinois' Fair Dealing Senator Paul Douglas.

For a year, Douglas has been trying to get the President to fill three vacancies on the Illinois federal bench, where the docket is badly overcrowded. By ancient senatorial privilege, as the state's only Democratic Senator, he is entitled to pick the men whom the President will nominate, He sent the White House three names. one of them a past president of the Chicago Bar Association. Jake Arvey's Democratic machine boys okayed Douglas' choice. But Harry Truman put off his decision, nursing a growing grudge. In the Senate, Douglas has fought long

& hard for Administration bills, including controls. But big Paul Douglas is no party hack. He criticized the Truman budget for having too much fat; he criticized Truman's cronies for their conduct in RFC. He also suggested at one point that if Harry Truman did not want the job next year. Dwight Eisenhower might make a good coalition President, In a fulldress speech in the Senate, he demanded that the Administration pursue a resolute course in Asia (TIME, Jan. 22), and once

* For news of another observation by the Chief Justice, see RELIGION. † Fred's father was Lawrence County jailer when Fred was born on Jan. 22, 1890, in the

Louisa building that housed the family's quar-

DAVIES For old China hands . . . he called Dean Acheson a war casualty who should be allowed to resign. Worst of

all, Douglas had even got himself talked about as a possible presidential candidate. Last week Paul Douglas decided he had better call at the White House, not to talk about the judgeships, but to make peace. He said he had no White House ambitions, had voted pro-Administration about 75 to 80% of the time, and would continue to. Truman, unyielding, read Douglas a lecture on party loyalty.

Two days later, a White House aide phoned Douglas to tell him that the Illinois appointments had been made. Two of Douglas' choices were rejected. Instead. the President had appointed Cook County

CLUBB ... new questions.

Judge Cornelius J. Harrington (who was introduced to Harry Truman by a mutual friend), and Municipal Court Judge Joseph Jerome Drucker, nephew of loyal ancient Congressman Adolph J. Sabath, The third nominee was Lawver Joseph S. Perry, former Dupage County Democratic chairman-on Douglas' but only by courtesy. Actually, he had been put up by ex-Senator Scott Lucas.

Douglas retired to nurse his bruisesand to consider appealing to an old senatorial custom; if he opposes the appointments made against his recommendation, the Senate is likely to refuse to confirm Harry Truman's choices.

THE ADMINISTRATION

A Question of Security

With an embarrassed air, the State Department admitted last week that it had suspended two of its topflight officers. Reason: they are under investigation as security risks. The men are Oliver Edmund Clubb, the department's director of the Office of Chinese Affairs, and John Paton Davies Ir., a longtime China hand who has been serving on State's Policy Planning staff.

Caustic John Davies was one of State's bright young men who, back in 1944, urged that the U.S. make friends with China's Communists as a matter of selfinterest. Born and educated in China, he joined the State Department in 1931, served in U.S. consulates all over China. at one time was a friend of pro-Communist Author Agnes Smedley. He is married to the daughter of Henry Grady, U.S. Ambassador to Iran (see below).

Force of Destiny, As chief political adviser to General Joseph Stilwell, when Vinegar Joe was chief of staff to Chiang that Chiang's regime was hopelessly corrupt and doomed, that the Chinese Communists had "mass support" and were "the force destined to control China. In a 1944 memorandum, Davies wrote: "We should not now abandon Chiang Kaishek . . . But we must be realistic. We must not indefinitely underwrite a politically bankrupt regime. And if the Russians make a determined effort to capture politically the Chinese Communists, rather than allow them to go by default wholly to the Russians." When Patrick Hurley became ambassador, he accused Davies & friends of being "favorable to Communism and against the policy of the U.S. in China," demanded Davies' dismissal, Davies was shifted to Moscow, where "Beedle" Smith regarded him as "a very loval and very capable officer of sound judgment. As a member of Dean Acheson's policy planning group, he is a top specialist in China affairs.

At New Masses, Clubb is another old China hand with a reputation as a member of the opposite camp who stoutly supported Chiang. As a Class One foreign service officer, he outranks Davies (only career ministers rank higher). Born and educated in Minnesota, Diplomat Clubb two years as consul general in Vladivostok. He was consul general in Peking when the Communists took over in 1950, was ejected when they seized the consulate over official U.S. protests. The charges against him apparently come from old hearings before the House Un-American Activities Committee, in which ex-Communist Courier Whittaker Chambers testified that he had once seen Clubb calling at the Communist New Masses office. Clubb vaguely remembers being there in 1932 and taking a letter of introduction from Agnes Smedley to Robert Morss Lovett.

State said that Davies and Clubb are only two of "several" officials who have been suspended pending hearings in a general review of some soo individual cases.

"Appropriate" Time

The President was all set for the question, at his weekly press conference, but no reporter asked it. So next day the White House put out an announcement; while the president of the president o

The fact was that Diplomat Grady, a success in the touchy job as Ambassador to Greece during the Civil War, had moved on to the new job in troubled Iran with the understanding that he could resign after a year. When the time came, in May, he reminded the State Department of the agreement, and was asked to stay on at least until September.

Likely successor to Grady when he does leave: Loy Henderson, Ambassador to India, onetime Minister to Iraq and longtime friend of the Arabs.

ORGANIZATIONS Time to Retire

Resolved, by the Sons of the American Revolution, in national convention at San Francisco: the U.S. should withdraw from the United Nations at the "earliest reasonable moment." Reason: the U.N.'s "original purpose of preserving peace has resulted in war."

LABOR

Rising Dough

The A.F.L.'s Teamsters Union won their rowdy ten-day strike against 16 large New York bakeries (Thur, July 16). Results: 4,000 bakery drivers will get six days' pay for five days' work. New York housewives will probably pay from one to four cents more for each loaf of bread.

INVESTIGATIONS Anything for the Boys

The great American game of gouging the G.I. is going full blast. Wherever the training camps are full to overflowing, the nearby towns small, and housing scarce, the chilesters are out. So reported the Senate Preparediness of Lyndon Johnson, this week, after inspecting more than 20 such three Johnson, this week, after inspecting more than 20 such consistent of Lyndon Johnson, this week, after inspecting more than 20 such as the precision of the prepared three prepared to the prepared three prepared to the prepared to

¶ A corner of a converted schoolhouse brought \$30 a month from a sergeant and

brought \$30 a month from a sergeant and his family of three. The building leaks badly, there is little heat, and the sagging roof is so low that it is impossible to stand except in the center of the room.

¶ One half of an abandoned garage was rented to a sergeant and his family for \$50 a month. There was no bath, no toilet, no water. When a rat bit off the index finger of the sergeant's six-month-old baby, the landlady refused to let the sergeant'd wife use her telephone to summon aid.

ILLINOIS

Ugly Nights in Cicero
Grimy Cicero, III. (1996, 67,000), which
huddles close to Chicago's west boundary,
has never had a reputation for being exclusive. During the roaring 'zoo, the Torin-O-apone mob roared through Cicero's
streets in armored cars, ruled its widerecommended to the commendation of th

That was one thing Harvey E. Clark Jr. didn't know. Clark, a Negro, graduate (A.B.) of Fisk University and a World War II sergeant, was sick of living in a tiny apartment on Chicago's South Side. with his two kids sleeping in the windowless hallway. He rented an apartment in Cicero.* But when he tried to move his family in last month, two Cicero cops refused to let the Clarks unload their furniture because they had no "permit." Beefy dered the Clarks to leave town, The realestate agent who rented the apartment said Chief Konovsky struck him several times and shouted: "Get out of Cicero and don't come back . . . or you'll get a bullet through you.

Growing Crowd. Clark, a Chicago hus driver, decided to make an issue of it. He filed a \$200,000 damage suit in federal court against Cicero officials and the town of Cicero. The court issued a temporary injunction, warning Cicero police to see to it that the Clarks were not molested.

But when they returned to Ciccro last week and moved their furniture into the apartment, they found a handful of Ciccro and Cook County police—and a large and hostile crowd. Frightened, the Clarks.left.—but the crowd didn't. Until midnight, the crowd milled in the street, booing, and jeering when Cook County Sheriff John Babb ordered them to disperse, occasionally throwing stones.

Next night the crowd was back, again, bigger and in an uglier mood. The 50 cops made no effort to stop teen-agers who, from well-hidden positions, tossed stones at windows in the Clark apartment.

Violence of Midnight. Around midnight the mob got boilder. A dozen or so young bloods rushed the cops at the doorway to the apartment house, pushed past them, smashed in the front door, clambered upstairs to the Clark apartment. Cheers from the crowd, went all of the Clarks' furnitue; including a plano. Then the young vandals tore out door and window jambs, gouged holes in the walls.

* Only 3½ miles from the Oak Park, Ill. home of Dr. Percy Lavon Julian, famed Negro chemist, Hoodlums tried to burn the Julian home in November, tossed a bomb in the front yard last month.

RIOTERS & GUARDSMEN IN CICERO From the darkness, false courage.

ripped out light fixtures, smashed radiators, a refrigerator and stove, bashed in the toilet bowl. For good measure they ripped up two apartments below the Clarks (the tenants, like most of the 19 families in the apartment house, had long since fled). Then the mass of broken furniture on the lawn was set afire and the cheers grew louder. Police did not make a single arrest. At about 2:30, the mob once again faded away, but everybody knew that it would be back.

At daylight, Sheriff Babb put through a call to Governor Adlai Stevenson, who called out five companies of National Guardsmen. Most of the day was spent in making preparations for the night. Vans, trucks and private cars shuttled back & forth, trying to save the belongings of tenants. One tenant, a retired Chicago cop, said, as he helped with the moving. "I saw a lot of things as a policeman but never anything like that. These people are savages

"Go! Go! Go!" By 7 o'clock the mob was back and pressing against police lines, which blocked off the area around the apartment house for a full block, Mostly, they were young fellows in T-shirts and dungarees, but there were also housewives in cotton dresses, a father holding his child on his shoulder to give him a better view. The crowd was good-natured, as if going to a game, and the cops acted like ushers politely handling the overflow at a football stadium. But as darkness fell, some in the crowd got false courage from the night. They tossed firecrackers over police lines. Pressing forward inch by inch. the mob began to push the police back. From time to time the crowd would chant: "Go! Go! Go!"

At about 8:30 there was the first tinkling of glass from the apartment house: a steel ball bearing, fired from a sling shot. hit a window, Police lines gave slowly, and within another half hour, the crowd, chanting "Go! Go Go!", had crept up to within 150 yards of the building. Cook County Police Lieut. Jack Johnson, an ex-marine who was in charge of the police detail, kept muttering: "Why the hell don't the Guard come on in?'

Shortly before 10 o'clock, the mob moved close enough to hit the apartment house with bricks and stones. The chant of "Go! Go!", the firecrackers and the sound of breaking glass became a steady din. Then, just as the mob seemed to be getting out of hand, there was the sound of sirens down the street and a cry: "It's the Guard!"

THE CLARKS Out the window went the piano.

As the ieeps, trucks, and vellow school buses filled with helmeted soldiers moved slowly up the street, the crowd booed. showered the convoy with firecrackers. bricks and stones, called out, "You lousy "Why the hell aren't you in finks,' Korea?" Out of the cars tumbled frightened-looking young Guardsmen, summoned that day from their jobs in grocery stores and gas stations, Each Guardsman had his bayonet fixed. The crowd inched backwards. Some in the front row of the mob were nicked by bayonets, and several Guardsmen were felled by bricks and by ball bearings fired from slingshots. Around the corner, several young vandals lit and tossed red railroad flares atop the apartment house; Cicero firemen braved a rain of stones to put out the fire, Graduallythough it took four hours-the Guard got the best of the mob, and emboldened police started dragging the most obstreperous young fellows out of the crowd. They took their prisoners over to look at a line of wounded Guardsmen, then loaded them into paddy wagons. Totals for Cicero's three violent nights: 23 hurt, 110 arrested. Harvey Clark was still determined to move in. Said he: "They destroyed everything we owned, everything we had accumulated in nine years of marriage-even

our marriage certificate. I sure didn't think all this would happen over one Negro

NORTH CAROLINA Assault at 50 Feet

Around Caswell County, N.C., Mack Ingram, 44, was known as a "good" Negro. He had raised nine children, saved enough to buy his own mule and tools, and even a ramshackle jalopy. He was proud that he rented his land instead of sharecropping.

One day last month Ingram stopped at the farm of Aubrey Boswell, a white neighbor. He wanted to borrow a trailer to haul his hay. Ingram eav one of the Boowell children walking foward the tobacco barn carrying a hoe. He walked across the road, he said, and through a field knee-high in corn, looking for Boswell. When he god the said is the said to the said the said to the said the

against her. Last week in the county courthouse, Recorder (roughly comparable to justice of the peace) Ralph Vernon heard Willa lean's story, "As I got off the road, he came up the highway and he kept watching me," said Willa Jean. "And I ran through those woods because I was afraid . . . and I kept going, walking fast, and he kept coming on, and I got a pretty good ways ahead of him and he stopped and stood and watched me," Then, said Willa Iean, "I looked back and didn't see him any more and I stopped there and was hoeing the ground, and as I was hoeing I asked my two brothers who that was and they told me, and I told them what happened and they went running to tell Daddy." Willa Jean said she burst into tears.

The defense had only one point to make: What did he do? Said Willa Jean: "He kept watching me." Just how close did Ingram get to her? Willa Jean wasn't

sure; "within 25 to 50 feet," she thought.
Prosecutor W. Banks Horton argued
that Ingram must have been trying to
head her off, that young womanhood must
be protected from "niggers." But Recorder Vernon, who is a farmer with no formal

legal training, could plainly see that there was no ground for a charge of intended rape. If there were, the case would have to go before a superior court—and a jury. Instead, he found lagram guilty of "assault on a female," and sentenced him to the maximum: two years of hard labor on the roads.

The verdict didn't even make the local papers. But outsiders got wind of it; Caswell County was deluged with inquiries, one even from the U.S. State Department. The Daily Worker seized on it. The National Association for the Advancement of Colored People, after first making sure that the Communist' legal baselse didn't get in on the case, decided to help Ingram in his appeal.

WEATHER "Most Disastrous Day"

In a normal July, Kanesa is as hot and dry as a wheat beard in the affermeon sun, with searing winds browning the stubble and curing the corn leaves. But this is no normal year. June was the wettest month in Kanesa weather records (since 1885), the contribution of the same of the cornel of the same of the cornel area of the cornel are not such as the cornel are not such

Almost every river in the state went wild, and the worst of all was the Kansas, which Kansans call the Kaw. Its waters rolled into Manhattan (pop. 18,066) in raging flood, and businessmen along the main streets had to be taken out in boats. More than 20,000 people were driven from their homes in Topeka, the state capital. Flood water spilled over the Santa Fe railroad tracks near Emporis and for

55 hours stranded 337 passengers in the crack passenger train El Capitan. Rancher Bill Brandt landed his small plane on a nearby highway 15 times to bring in supplies and to take out five sick passengers.

Worse than '03. The roaring tide delivered its most crushing blow at a target that was expected to resist it. The Kaw flows into the Missouri River at the Kansas Cities. There the low-lying industrial districts are protected by flood walls as high as 22 feet, built to cope with high flood in 1903. The flood of '51 roared over the levees, covered the Santa Fe's great transfer vards and shops, inundated the spreading stockyards, coursed through factories. Rescue workers had a hard time convincing some oldtime residents to leave, so sure were they that the flood would be no worse than in 1903. Mrs. Emile LaBorde, who had lived there 32 years, baked a berry pie for her husband while sirens roared outside. Finally the LaBordes retreated to the upstairs. kept counting those 14 steps," said Mrs. LaBorde, "It wasn't so bad until it got up to No. q. When the water got to the top step, I decided to go out the window. Rescuers in a boat got the LaBordes out. Others were less fortunate: workers heard away. Water covered 1.384 square blocks of the two cities. It flooded the pumping station which furnishes water to about two-thirds of Kansas City, Mo.

And Then Fire. Then fire was added to water. The flood ripped up a crude oil storage tank and hurled it against a high tension wire in Kansas City. Mo. The flaming tank drifted into more gasoline soo feet into the air as the tanks capided. Flaming oil and gasoline raced on op of the flood, while firemen in boats vainly poured flood water back on to the fire. The blaze, feet by more than one million gallons oil oil, demolished ten than one million gallons oil oil, demolished ten City's most disastrous day."

In all, more than 100,000 people in Kansas and Missouri were driven from their homes, and 41 were killed. Flood waters covered 1,500,000 acres. Major General Lewis A. Pick, chief of the Army Engineers, estimated damage at \$750 million, the costliest flood in U.S. history.

ARMED FORCES "Not Enough Glory Hunters"

Twice before in its 175-year history, the proud U.S. Marine Corps had trained draftees to fill its ranks, but not until last week did it have to ask for them. Enlistments were now below the corps' 6,000-man monthly recruiting quota. Furthermore, 75,000 reservists on active duty are soon to be let out, and the Marines' are already bard put to fill their ranks. Selective Service promised the Marines 13,000

THE FLOOD AT KANSAS CITY, Mo.
Fury where the Kaw meets the Missouri.

* Of the Marine fighting force in Korea at the time of the famed withdrawal from the Changjin Reservoir, 32% were reservists. draftees in the next two months and more later if enlistments keep on sagging.

In 1018 and again in 1043, the Marine Corps was ordered to take draftees, not because it needed them, but because is needed them, but because in many fough young men volunteered that the other services felt cheated. The Massett of the Marines of the services of the serv

Aerial Slingshots

"The U.S., which whipped the Jap air defense to its knees and then walked in and dropped an atomic bomb, now finds tistelf in the same position. It cannot stop an enemy bomber coming in at high altitude." This alarming statement, came last week from an arms expert working for the Defense Department's top-leved Research and Development Board, He is one of a group of arms men who spert months regroup of arms men who spert months evaluation tests at the Army's Abeddem Proving Ground. Their conclusions:

of The World War II-model guns mounted on U.S. interceptors—a 150-cal. machine gun (developed in 1518) and a 20-mm, cannon (developed during the 150s—cannot shoot down an enemy jet bomber with any efficiency. In Koren, one F-56 pilot had to spray 14,00 rounds of 150-cal. fire at a Russian MIG-15 fighter before it went down.

¶ Rockets now in production are wildly inaccurate. Pilots report an average of only one hit out of 40 tries at stationary ground targets. For air-to-air combat at supersonic speeds, present rockets are practically useless.

Blame, Aircraft armament is really not much further along than at the end of World War H. Armament is the monopoly of Army Ordnance, a powerful, welllodged bureau which makes weapons for all three services, and operates in a field where resistance to unification is greatest, Sample: Ordnance and the Navy are now experimenting with two different types of 20-mm. cannon shells which will not be interchangeable. The arms experts think that Ordnance needs a little competition from private industry. Ordnance itself blames the Air Force, and gets some support from the arms experts, Until recently, said the experts, the Air

Force has put its faith in slingshot weapons, unwilling to sacrifice the high performance of its aircraft for heavier fire power. The jets caught them nappins. With thick skins. fewer moving parts, simple fuel systems and high speed, the new aircraft usually shake off machineter of the power of the power of the Finally, report the guinnes, the conomymided reign of Defense Secretary Louis Johnson stiffed all but the most impor-

Prosecutor Saypol. Vigilant.

tant research in aircraft weapons. At that point the Air Force and Ordnance stacked their chips on rockets.

Fost Firing. In ten years, if all goes well, the U.S. will be equipped with guided missiles and proximity-fused spinning rockets. But right now the need is for a fast-firing, high-velocity 30- or 57-mm. cannon to fill the gap between pea shooters and rockets, and topnotch industrial

engineers to design and produce them. The Russians have already started to bridge this gap, while (presumably) waiting for accurate rockets. In Korea. one amament man pointed out, 40 heavily ecorted U.S. Be-250 were suddenly jumped by 50 Russian MIG-15 lighters. The both of the summer of a few minutes. The MIG-15 amment was 250 minutes.

COMMUNISTS

The Sheepdog

Irving H. Saypol, a stocky New Yorker with a firm chin, is now the nation's No. 1 legal hunter of top Communists, He helped Tom Murphy prosecute Alger Hiss, collaborated in the trial of the top eleven Communists and-after becoming U.S. Attorney in New York last year-convicted William Remington and Atom. Spies Julius and Ethel Rosenberg, Last week Prosecutor Saypol was busy as a sheepdog. He was trying to keep a handful of second-string Communists within the law's purview, to make sure that they are still on hand when it comes time to try them for conspiring to teach and advocate the violent overthrow of the U.S.

From the moment of their arrest a month ago, he has been on their heels, opposing every move to reduce their bail. He carried his vigilance even further. He argued that the \$171,000 bail which they

did produce was "tainted," since it was provided by the Communist Civil Rights Congress. He persuaded Federal Judge Sylvester Ryan to revoke the ball and respirated from the construction of the ball and the bonds could be more closely secrutinized. His argument: the Civil Rights Congress umblinkingly forfeited \$3,500 and sail when Top Communist Gerhant Eisler field the U.S., also stood surery for the of whom have since jumped ball.", four of whom have since jumped ball.", four

of whom have since Joinpect bail.

An attorney for the Communists rushed to the court of appeals to argue that, the court of appeals to argue that, the court of appeals to argue that the state of the court of appeals to argue that the court of the cour

MANNERS & MORALS

Hot Argument

New York's gum-chewing Daily News took time out from huffing at Harry to return to a hot-weather editorial battle it has been waging for years. Subject: men's summer wear-too many, too heavy and too hot. Said the News: "We've never . . . blown our editorial horn for any nudist cult . . . Where do you put your change, cigarettes and matches? [But] we've urged outright rebellion against any and all social edicts which say a guy has to pull a hot jacket over a carcass which already, probably, is steaming like a 1908 Maxwell. Down with any heartless females and etiquette fanatics who'd still like to see us looking like boiled lobsters and feeling like steamed clams." The News confidently headlined it: WE'RE WINNING THIS ONE, GENTS,

Actually, the battle is far from won in New York City, one of the nation's strongholds of the summertime coat and tic, where many a stuffy restaurant owner keeps a supply of odd-size jackets on hand to make sure that customers can be made socially acceptable on hot afternoons, But this week the Gallup poil reout of ten U.S. women, said Gallup, now look with approval on shirt-sleeved males.

WAR IN ASIA

CEASE-FIRE

Toward an Agenda

After three days during which the Reds made up their minds to yield to U.N. demands (see o.l. a.), the negotiators were back at their conference table. The Kaesong talks went on behind an enclosure of barbed wire and strictest secrecy, but the Communists broadcast to the world their conditions for a cease-fire or a cease-fire.

Q The opposing armies to withdraw to a distance of ten kilometers (about 6.2 miles) north and south of the 38th parallel;
Q The 12}-mile-wide strip thus created across the peninsula to be under the civil administration of the North and South

Korean governments:

¶ Prisoners to be exchanged;

¶ All "foreign troops" to withdraw from

present U.N.-held line, requiring the Com-

¶ An international commission with full power of inspection in North Konea; ¶ No further shipments of war material or "volunteers" to Korea.

This week the U.N. command reported progress at Kaesong toward an agenda. Once the agenda gets written, the real struggle of the conference will begin.

Red Backdown

munists to move back;

The first decision in the Battle of Kaesong went to the allies.

song went to the antes.

The Communists, who had insisted on Kaesong, a town in Red territory, as the scene of the truce talks, took over the place, behaved as if they were the victors receiving a peace delegation from a beaten enemy. Communist propagandists spread

RED TRUCE TEAM: GENERAL NAM (CENTER), WITH KOREANS (RIGHT) & CHINESE (LEFT)
Behind the barbed wire, the real struggle began.

Korea in "the shortest possible time." This set of terms is clearly unacceptable to the U.N. Item: it would cause the U.N. forces to give up substantial ground already won. Item: it provides no machinery. e.g., mutual inspection, to make sure that the truce is kept. Item: to withstance with the shortest possible time? would be to leave South Korea to the mercy of the Communists once again.

The U.N. kept officially silent about the Red proposals, but in an unguarded moment, Rear Admiral Arleigh ("31-Kont") Burke implied that the U.N. had refused at the first meeting to discuss withdrawal of troops from Konsa. Resent: that is a political matter, and state of the control of the

¶ A 20-mile-deep buffer zone between the opposing forces, roughly along the the picture of armed Chinese and North Koreans blustering over unammed U.S. delegates (see below). Matt Ridgway is not the kind of man to take such treatment calmly. He seaded on being allowed to cover the meetings (see Pesss) and used that issue to show the Reds—and the world—that the U.N. was not begging for neare.

First Day. Before leaving Munsan in his helicopter for the first day of the truce talks, Vice Admiral Charles Turner Joy, the chief U.N. negotiator, scribbled a word for the throng of newsmen who were being left behind. "We, the delegation from the United Nations command, are leaving for Kaesong fully conscious of the importance of these meetings to the entire world. We are proceeding in good faith to do our part to bring about an honorable armistice . . ." The word "honorable" was heavily underscored. Supreme Commander Ridgway accompanied the admiral to his 'copter, As the machine rose, Joy, responding to the correspondents

farewells, crossed his fingers and rolled his eyes heavenward. Ridgway said to the newsmen, with unaffected earnestness: "This is a historic moment."

In the conference room at Kaesong, the five-man U.N. team were met by the five Red bargainers. North Korean General Nam II, leader of the Red delegation, turned out to be a fine figure of a man and a crisp, impressive soldier. He was resplendent in boots, red-striped trousers and gold-laden shoulders.

Nam II studied his watch as the seconds ticked away. Exactly on the stroke of the scheduled hour, he signaled his interpreter, and the talks began.

Admiral Joy delivered an opening statement in which he assured the Reds of U.N. good faith. The heart of his statement was that the U.N. delegation would not discuss political or economic matters or military matters outside of Korea.

Then Joy proposed that allied newsmen be admitted into the conference area. After consulting with headquarters, General Nam replied that it was "not the time yet for the press to come in."

Between meetings, the allied delegates were ushered about by Tommy-gunt-toting soldiers. When Joy sent a messenger back to the airfield for a briefcase, it took the messenger on minutes to break his way through the Communist guards. That probable to the same of the same state of th

Second Day, The Red radio broadcast detailed accounts of the first day's conference, triumphant in tone, while the U.N. kept mum and allied newsmen, barred from Kaesong, had almost nothing to report to the world. Five civilian newsreel and newspaper photographers slipped past the Communist roadblocks on the ground that they were "accredited to the U.S. Army," reported some details of the Communists' highhanded behavior in the Kaesong area. Chinese troops lined the roads, bristling not only with burp guns but also with captured U.S. carbines and British Sten guns. In Kaesong, the only freedom of move-

In Kassong, the only freedom of movement for the U.N, people was along the Munsan road, and between the meetinghouse and the U.N, headquarters; house, two blocks away. This headquarters, which stood between low hills on the outskirts of Kacsong, had been assigned and fursiant refurnished it with articles tracked up from Munsan. Outside the headquartees house was a stone table bearing the words Yung-ting Tai—meaning Everlasting Stability Terrace.

At the conference table, Admiral Joy again demanded that allied newsmen be admitted to Kaesong, Replied General Nam: "The matter must be reserved." Then Joy read a sharp message from Ridgway: "The presence of . . newsmen

at a conference of such major importance to the entire world is considered an inherent right by members of the United Nations . . ." Matt Ridgway had decided to force the issue. Joy told the Reds that a truckload of 20 newsmen would go to Kaesong next day.

Third Day. As the correspondents started out next morning for the conference, Ridgway wished them luck. At the Communist check point north of the Imjin River, armed Red guards told the convoy commander that it could not pass, There was a wary and polite argument. The man who pretended to be in charge of the Red roadblock was a nervous young North Korean lieutenant. The man actually in charge was a small, pock-marked Chinese. As the dispute waxed hotter, the Chinese coached the young North Korean more & more openly.

The U.N. ieeps and trucks turned around, one by one in the narrow road, and rolled back to Munsan, Admiral Joy and his four team members, who had been waiting at Munsan, did not take off in

their 'copters that day.

Joy sent an indignant message to Nam Il making it clear that the truce talks had been broken off because of the blockade, "I am prepared to return with my delegation and continue the discussions which were recessed yesterday upon notification nel of my choosing, including such press be cleared to the conference site.

Fourth Day. The Communist answer to this was a petulant suggestion that Joy had no valid reason for his action, asked that the conferences start up again on the same basis as before, Cried Radio Peking (in its own brand of English); "There is some dubiety that the American side sincerely wants peace."

Matt Ridgway saw his opening and moved decisively. Over General Nam Il's head, he sent a crisp, soldierly message to

Korea's Kim Il Sung and China's Peng Teh-huai, the two Red bosses with whom he had done the preliminary dickering leading up to Kaesong. Said Ridgway: "The assurances which I require are simple and few . . . The establishment of an agreed conference area of suitable extent completely free of armed personnel of either side, Each delegation must have complete reciprocity of treatment to in-clude complete and equal freedom of movement to, from and within the agreed conference area and . . . include representatives of the press.

"I therefore now propose that a circular area with its center approximately at the center of Kaesong and with a five-mile radius be agreed upon as a neutral zone . . . I propose that we both agree to refrain from any hostile acts within this zone during the entire period of our conference. [And] I propose that we agree that the area of the conference site and the roads leading thereto used by personnel of both delegation parties be completely free of armed personnel . . .

Fifth Day, Matt Ridgway, acting on his own authority, had taken the accurate measure of the men he was dealing with. The Reds capitulated. Said Kim and Peng in a message to Ridgway: "In order to prevent this tiny problem from causing rupture of the negotiations, we agree to your proposal . . ." To Nam Il, Admiral Joy proposed a resumption of negotiations at 2 p.m. Sunday. In five minutes, Joy had an answer, Said Nam: "I will welcome your delegates at 1400 Seoul time," It was

Inside Kaesona

At last the eyes & ears of the Western world could examine Kaesong. Fourth in a convoy of 16 vehicles was a six-by-six truck carrying 20 allied correspondents and photographers.

The only armed Communists they saw were two M.P.s directing traffic with burp guns slung from their shoulders. (Admiral Joy had agreed to a "necessary minimum" of armed Communist soldiers.) Outside the conference building (newly designated by the Communists as "United Nations House") they found two North Korean officers and a woman sergeant, pert in an olive jacket and blue skirt, who turned out to be a Miss Park of Pyongyang. The three told the U.N. convoy commander they were there to provide any services they could

Miss Paik of Pyongyang, On the porch of a Korean house nearby were about 20 Communists, half of them North Koreans with shoulder boards and fancy uniforms, half, Chinese with unstarched, unmarked yellow-green uniforms. Some wore badges

U.N. CONVOY STALLED EN ROUTE TO KAESONG Required: simple and few assurances.

with "Reception Personnel" inscribed in English and in Chinese or Korean characters, others appeared to be the Chinese

Communist and U.N. cameramen opened up no one another. In some cases the lenumen closed to a yard or less; one chines movie camerama pot so excited that he fired for half an hour with all three of his lenses capped. Some of the Communists relaxed to the extent of returning a smile. But several refused U.N. cigarettes and one turned away to spit on the ground.

"A U.S. corporal going about his communications duties was amazed to hear Miss Paik of Pyongyang call out in English: "How long have you been over here?" He answered. "Thirteen months, almost," and she said, "That's too long," The corporal asked her what her people wanted anyway—maybe a unified Korea wanted anyway—maybe a unified Korea warred Miss Paik, that was about it. "Who do you want to run it," asked the corporal, "the Communists or the U.N.?" Sergent Paik smilled discreetly and shook

her head.

At the Green Toble. The reporters were not admitted to the conference room, but got a detailed picture of what it was like inside. The North Korean delection was a superior head, General Nam II, amoded incessance to the proceedings of the conference of

was seated similarly, with Admiral Joy opposite Nam.

Behind the delegates were their aides, and behind them accretaries and short-hand reporters. After Joy spoke, always from a manuscript, an interpreter repeature, and the state of the total part of the commades from behind the Valu. Sometimes young Korean grist in uniform gawked in at the windows—just like peaching the state of t

BATTLE OF KOREA

"Hostilities will continue . . . until such time as there is an agreement on the . . . armistice . . . "

So said Vice Admiral Joy, chief U.N. delegate at the truce talks. On the eastern front last week, attacking South Koreans were driven back by counterattacking North Koreans, South of Kumsong, the Reds' central front bastion, U.N. forces gained more than a mile against heavy machine-gun fire. But the general pattern was one of watchful waiting.

While the cease-fire talks are going on, the U.N. commanders have to keep contact with the enemy in the field and prevent him from gaining ground. Within those limits, they are saving their men. For the time being, they were not trying to kill large numbers of Reds—but they could start that again, any time.

DOWN WITH THE TRUCE was the consenses of this crowd of 80,000 South Koreans gathered in Second Last week to protect a "pace ow which ut unity." All over free Korea, ward and block leaders last week ralled other crowds to decry a settlement with the enemy that would still leave their contryl dvided. Wrinkled old President Syngman Rhee himself shook off a cold to buttonhole General Ridgway on the subject. The Korean Ambassador presented his country's formal objections in Washington.

PROPAGANDA

Stalin's Mustache

Out of the Kaesong cease-fire talks, world Communism is making a loud, crude but effective propaganda symphony. One of its two theme is Red "victory"; it portrays the "Western aggresson" as white flag, and helplessly suing for peace. The other theme is Red "peace"; it portrays the same aggressors miraculously risen from the dust, intact and blood thirty, help-bent for more and bigger wars—while the Communist blue, pure of the olive branch. to toward none, wave

Billinonired Drooms, Asians are getting the fullest force of the victory blast. The Reds took movies of white-flagged U.N. convoys and unarmed U.N. negotiators surrounded by armed Communist guards. Hong Kong is sure that the pictures have though the control of the control of

Korea cheaply."

The Reds, now rocked by General Ridgway's decisive reversal of the course of the truce conference, are not trying the full-blast victory theme in Europe-because they know that they cannot get away with it, and knew it even before Ridgway struck the issue. Instead, they are plugging the peace theme. Communist papers complain of Ridgway's truculence in breaking off the talks, represent the Communists as "patient," the U.S. as "power mad." The London Daily Worker printed a photomontage showing five smiling world leaders sitting around a conference table: Truman, Stalin, France's Schuman, Britain's Attlee and Red China's Mao Tse-tung. Banner: THESE FIVE MEN CAN MAKE PEACE. Caption: "This is the picture the world is waiting to see."

Psychological AHack. Moscow's men launched a new English-language semi-monthly magazine, quainfuy christened News. Piped the first issue of News: "We do not believe that war is inevitable. We are firmly convinced that peaceful international cooperation is possible and indeed essential for tranquility and se-

curity . . . "

The peace theme is the more dangerous of the two; it is, in fact, a psychological attack on the resolution of the free world. Asid Stalin's former pupil, Tito, last week: Moscow's cease-fire overture is "only a maneuver—to calm things down in Korea in order to open fire in another place... The North Koreans have heated up the soup and now they have burned themselves..."

Concluded Tito: "Stalin is known the world over for his mustache, but not for his wisdom."

INTERNATIONAL

TREATIES

Pacific Pact

The U.S. last week took an important step toward security in the Pacific: acting for the State Department, John Foster Dulles initiated a mutual-defense pact with Australia and New Zealand. The treaty, initiated at the same time by both ous and effective self-help and mutual aid," establishes a Pacific council of foreign ministers to implement the plan. By its terms the three nations declare "their sense of unity, so that no potential aggregation of the packet of the packet

Terms of Peace

Also announced last week: the terms of the momentous Japanese peace treaty, to be signed at San Francisco on Sept. 4 by the U.S., Great Britain and some 50 other former enemies of Japan, Main points: ¶ Japan becomes a fully sovereign nation with authority to rearm or develop its economy as it pleases.

¶ Japan is eligible for U.N. membership. ¶ The occupation of Japan ends 90 days after the treaty goes into effect—but the U.S. will sign a separate agreement to permit its forces to keep air, sea and land

¶ Japan will pay no cash or material reparations, but will give reparations through labor. Under this plan, former enemy countries may send raw materials to Japan to be processed, free of charge. ¶ Japan renounces its claims to Formosa

(held by the Chinese Nationalists), the Kurile Islands and South Sakhalin (Russia got both at Valta), the 623 formerly mandated islands of the Caroline, Mariana and Marshall chain (now controlled by the U.S. under U.N. trusteeship), and the Bonia and Ryukyu Islands, including B-29 base Okinawa (now occupied by the U.S.).

In Washington, Ambassador Dulles, who in 14 weeks of hard globe-trotting convinced the U.S.'s allies that the best hope for permanent peace with Japan lies hope for permanent peace with Japan lies said: "The treaty is truly one of reconicitation. Never in modern times have the victors in a great and bitter war applied this principle. They have, in the name of peace, imposed discriminations and bereath of the peace, imposed discriminations and but would avoid that great error." "". I.W."

Russia has been invited to Sun Francisco but is not likely to accept: the Kremlin demanded last month that the Japanese treaty be turned over to a Big Four conference of the U.S., Russia, Britain and Communist China, assailed the U.S. plan, which excludes the Chinese Reds—like the Nationalists—from signing the treaty (Japan will be free to choose later which Chinese regime it

U.S. BUILDUP IN NATO defense army has brought three divisions into Western Germany, with two more coming, Already on the scene: the lat Indanty ("The Big Red One"), commanded by Brigadier General Thomas Sherman Timberman; the 4th Indanty, commanded by Major General Harian Nebon Hartness, Now arriving: the Indanty, commanded by Major General Harian Nebon Hartness, Now arriving: the Birkhimer Palmer. Total number of U.S. troops: 130,600 men, of whom 85,000 are combat soldiers, concentrated in the Seventh Army, under Lieut. General Manton Sprague Eddy, with headquarters at Stuttgart. The balance: housekeeping and occupation troops. Scheduled to arrive before year's end' the Mrc Division, to be based upon the U.S. will contribute five of General Dwight D. Eisenhower's (planned) army of 14 NATO divisions.

U.S. troops atill "have it good" in Germany (plenty of recreation, good food, barracks that resemble U.S. college dominicise, etc.), but there is plenty of and work, as the units are being put on a combat basis. Chief difficulty facing the insufficiently trained U.S. forces: lede of adequate room for training, One-hundred-square-mile Grafenwohle U.S. forces: lede of adequate room for training, one-hundred-square-mile Grafenwohle training ground in crowded Germany. The Twelfith Air Force fighter plots must fly to the North African deserts for fring practice. Antalizeral batteries travel to Syif on the Danish frontier to fire their big guns. Medium bombers of the 3rd Air Force, based in England, use Heigoland for bombing practice. Jet planes are based at Fürstensche felbruck, Neubiberg, Erding und Ausphurg, only a few minuted Tying time from needed through the ports of Bremerhaven in the British zone and Borolessus in France.

wishes to make peace with). Last week the State Department rejected the Russian proposal. Said Dulles: "I hope the Russians will come along, but... we will proceed in any event. They have no veto

Most allied objections to the draft treaty—Britain wanted a more punitive peace, France didn't want to irritate Russia—have been ironed out. Still dissatisfied: the Philippines, which protests bitterly that the treaty will too quickly restore Japan to dominance in Asia, still insists on reparations. Indonesia, too, wants "quite a bit of money" from Japan.

THE NATIONS

Business Was Business

Britain is cracking down on trade with the enemy. Frouded by the U.S., the Brit-ish government last week invoked World War II defense statutes to requisition; two nearly completed 7,600-ton tankers which Bartram & Sons shippard had contracted in 1040 to build for Red Poland. The Poles have already paid most of the purchase price. Said the British Foreign Office: Poland will get her money place.

STRATEGY

Ring Around Russia

Last week brought good news of air bases for the West's air arm:

¶ The U.S. Air Force announced conclu-

¶ The U.S. Air Force announced conclusion of an agreement with France to build five permanent air bases and a permanent headquarters for the Strategic Air Command's 5th Air Division in Morocco. From Britain, an unrevealed number of B-comedium bombers, flew to the new bases (see "O") and the property of the U.S. record agreement with Sauld Arabia to use its huse U.S.-buill Dhahran Airfield for the next five years. Hitherto,

RITA MONTAGNANA
Instead of a motherly senator . . .

the U.S. has had only year-to-year agreements. The field can handle the Air Force's largest strategic bombers, commands the whole Middle East area.

¶ In Washington, the House Armed Services Committee voted more than a fillion dollars to the U.S. Air Force for construction of new secret bases, many of them reportedly in the Mediterranean and Middle East, within striking distance of the Soviet Union.

COMMUNISTS

Social Notes

Morriaga Reported: Svetlana Dahusakwil; die felianded daughter of Joseph Dahugashvili, hetter known as Stalin: and Mikhali Kaganawith, son of Larar Kaga-Mikhali Kaganawith, son of Larar Kaga-British and Swiss newspapers said the nupital feast in the Kremlin lasted a fornisht, with refreshments served on Carriat gold plate and sped with piny for the process of the property of the

Separated: Palmiro Togliatti, 58, Italian Communist boss, and his motherly wife, Communist Senator Rita Montagnana, after 27 years of marriage. Last year when the Togliattis left their de luxe apartment on the left bank of the Tiber. Rita went to live in Turin with their son Aldo, 26, and Palmiro moved out to a smart suburban villa in Rome, Last week they got a legal separation, which, however, does not permit them to remarry. Rumor said Togliatti might get a divorce outside Italy. The other woman: his personal secretary, buxom Communist Deputy Leonilde lotti, 31, with whom he has been keeping steady company for several vears.

Reported Dead: Maurice Thorez, 51, France's Communist boss until last November, when he suffered a stroke and was flown to Russia for medical treatment. Persistent rumors from Warsaw and Stock-

holm say Thorez died in Moscow. The French Communists deny the reports, claim that Thorez is, in fact, getting better. Possible reasons for keeping Thorez death secret: 1) the problem of his succession in the French Communist Party; 2) reflection on Russian surgery.

Removable Congred. Verra Grosa, Premier of Communist Rumania, and Vulko Chervenkov, Premier of Communist Bulagaria. New York Times gadabut. Correspondent C. L. Sultherger heard last week that both had been relieved of all their than a stooge for the Communists, has been assailed for months past as a "deviationist" by Ana Pauker's ruling faction in the party. FOREIGN NEWS

IRAN

Operation Miracle

Four men stood near a runway at Teheran's Mehrabad airport one day this week, waiting for the arrival of an American who was coming to try to work a miracle. At 11 o'clock, a U.S. Air Force Constellation landed, Out stepped W. Averell Harriman (see box) and his wife. The four men, antagonists in the great oil dispute which threatens Western Europe's oil and the world's peace, pressed forward to greet him: Iran's Foreign Minister Bagher Kazemi, representing a government hell-bent on nationalizing oil; U.S. Ambassador Henry Grady, who had tried his hardest to mediate, failed, and was quitting (see NATIONAL AFFAIRS); Norman Richard Seddon, the Anglo-Iranian Oil Company's harassed chief representative in Iran; and British Ambassador Sir Francis Shepherd. who first said Harriman's mission had "not much point," later reversed himself on receiving tart word from London.

Blinking in the harsh sun, Harriman said: "I am not a mediator, I came here to see whether amicable discussions can attain the objectives both Iran and Great Britain desire. I shall stay as long as I

can be useful.

Harriman and his wife drove 15 miles into the cool Elburz foothills to the sumptuous summer palace, pressed on him by the Iranian government for his stay. While two pools gurgled in the hilly garden outside, the party took lunch. Upstairs, servants freshened the Harriman bedrooms, bore in jerry cans filled with embassy well water (to ward off "Teheran tummy"),

That evening, the Communist-led Tudeh party struck in Teheran. The success of the Harriman mission would arrest Iran's march to chaos and kill the Reds' chance of taking power in a bankrupt country. Ten thousand demonstrators, shouting about "Harriman, warmonger" and "Rapacious American imperialists," rushed toward Majlis Square.

Premier Mossadeq's right-wing National Frontists heckled the Reds and fists began to fly. When the police moved in to protect the Frontists, the Tudeh retaliated with bricks. Four light army tanks rumbled forward; police on trucks and horseback rushed in, flailed the rioters with sabers: there were shots. The Tudeh raised their dead to their shoulders to show them off as martyrs, and fell back. In half an hour, hundreds were wounded, several were killed, and Majlis Square was clear.

Next morning, police and steel-helmeted soldiers bearing fixed bayonets raided Tudeh headquarters, closed down two pro-Communist newspapers, and the government clamped martial law on Teheran, Tudeh leaders vanished, Harriman called on Premier Mohamed Mossadeq, talked for 70 minutes, made plans for a second meeting. For the moment, the Tudeh had been held. Teheran, tensely quiet, waited for the Harriman miracle.

TIME, JULY 23, 1951

TROUBLESHOOTER IN TEHERAN

HARRIMAN

Arrived in Iran last week, on one of the toughest. potentially most crucial diplomatic missions undertaken by the U.S.: W. (for William) Averell Harriman,

Born: Nov. 15, 1891, in New York; silver-spoon son of Railroad Empire Builder E. H. Harriman who controlled 60,000 miles of the nation's rails, including the Union Pacific.

Education: Groton, 1909; Yale, '13. Schoolmate at both: Dean Achesor

Business Career: During summer vacations from college, worked as a clerk and section hand on the family's Union Pacific. In 1915, two years after graduating, became a U.P. vice president, board chairman in 1932; also (1931) a partner in the banking house, Wall Street's

Brown Brothers Harriman & Co. Introduced "streamliners," low-cost dining cars; turned 4,200 acres of snowbound railroad land into moneymaking Sun Valley, Gave up shipbuilding venture in the face of rugged competition: abandoned a Russian manganese export concession fearing Soviet nationalism.

Political & Diplomatic Career: Broke with the Republicans and voted for Al Smith in 1928. Great friend and follower of F.D.R., he became the tame, showcase millionaire of the New Deal. Held several jobs in the early years of the Roosevelt revolution, mostly trying to soothe irritated fellow businessmen. Defense Expediter in London (1941) to speed the flow of lend-lease aid to Britain and Russia. Ambassador to Russia, 1943-46. Had monthly conferences with Stalin, probably knows him better than any other American (Stalin presented him with a white horse). In 1945, sensed the impending break in the U.S.-Russian wartime alliance, shocked the State Department by urging firmness toward the U.S.S.R. Ambassador to Great Britain, 1946; Commerce Secretary, replacing Henry Wallace (1946); Marshall Plan ambassador to Europe (1948-50). Last year became President Truman's Special Assistant on foreign policy, helps ghostwrite Truman's foreign policy speeches, sat in on MacArthur's firing (which he strongly approved).

Appearance: Tall (6 ft. 1 in.), slim, round-shouldered, sad-faced, like a

slightly healthier Harry Hopkins,

Private Life: Was divorced by his first wife after 14 years of marriage, in 1929; two daughters. Remarried in 1930. Relaxation: bridge, canasta, croquet, a collection of Van Goghs, Renoirs, Picassos, Gauguins, Winston Churchills. Washington Appraisal: Operates intuitively, has shown remarkable foresight

on occasion, but is unpredictable. By his own admission runs "an orderly shop in a disorderly sort of way." Has a sharp mind, is unimpressive on the platform, but often successful in informal conferences. Washington nickname (used affectionately by some, acidly by others): "Misty Bill."

MIDDLE EAST Turnabout

On July 1, a 716-ton freighter bound through the Red Sea on legitimate business for the port of Aqaba, Jordan, and

proceeding in international waters, was stopped by a warning shot from a corvette. An armed party from the corvette boarded the freighter, locked her crew below decks for 13 hours, looted the ship's stores and smashed its radio. The Foreign Secretary of the affronted nation sat on the story for ten days while he nervously checked and rechecked accounts of the incident. When the Foreign Secretary finally protested this violation of his nation's rights, the offending nation said arrogantly, through a spokesman: "There's too much fuss being made about the affair.

The story seemed to fit a familiar pattern: Was this not another case of a big, nasty, imperialist nation bullying a smaller, law-abiding country? As a matter of fact, the injured party was Great Britain and the arrogant bully was little Egypt.

Intolerable Tailtwister, Ever since her spanking defeat by Israel three years ago. Egypt, despite repeated protests, has stopped all vessels moving through the Suez Canal that might be going to Israeli ports. When the Labor government's Foreign Secretary, Herbert Morrison, responding to a Tory question, revealed the details of this incident last week, Commons exploded. Coming on top of Britain's humiliation in Iran, it seemed a tailtwister that the British lion did not have to suffer in silence, Asked the Tories' second-incommand, Anthony Eden: "Is not the real lesson of all this that the more concessions we make to some of these Middle Eastern countries at this time, the more our national interests and the interests of peace will suffer?" Replied Morrison: "No, sir.

But the Admiralty dispatched four 1,710-ton destroyers from Malta to the Aqaba area. Said the Daily Express: "Britain's patience with Egyptian pretensions . . . wins her no credit among these backward peoples. Merely contempt." A London bus conductor fumed: "It's about time we shook our fist under their noses

those damned foreigners."

Threatening Hint. Egypt's Foreign Minister. meanwhile, hinted that, unless Britain removed het troops now guarding the Suez Canal and completely quit the Anglo-Egyptian Sudan, Cairo would denounce the mutual defense pact between Egypt and Britain, which still has five years to run.

In New York, Israel Israelly called on the U.N. Security Council to end Expyt's blockade of Israeli-bound ships passing through the Suce Canal. Israel charged that the blockade violated the Expytian-Israeli armistic aereement, the Suse Canal convention and, by preventing Middle Cast only to Abadan), endangered Western Europe's oil symply.

GREAT BRITAIN

Census

Findings of Britain's latest census, first in 20 years:

¶ 50.210,472 people live in Great Britain and Northern Ireland, an increase since 1931 of 4.172,115 or 9.1%.

1931 of 4,172,115 or 9.1%.

¶ There are still more women than men: 26.083,023 v. 24,126,549.

The birth rate, after falling for 60 years, leveled out just before the war, has since increased. In England and Wales there were 713,000 births in 1949-50, 626,000 in 1931-32.

¶ 745.000 more people (most European refugees, immigrants from the Commonwealth and Ireland) have entered Britain since 1931 than have emigrated.

¶ Britons seem to be moving slowly back to the country—or at least the suburbs. Britain's rural population is up about 2% (19.3% v. 17.6% in 1931). ¶ Greater London, still the world's largest city, is shrinking: population dropped from an estimated 8.728,000 in 1939 to 8.346,-137 in 1051.* Many Londoners evaluated during the war decided not to return.

Back at Work

In health again, but looking a shadow of his old self, King Georgies back going about his royal duties at Buckingham Palace. He spent three weeks in retirement at Windsor Castle, recuperating from the severe lung inflammation that laid him low last month. The King's first public appearance since his illness: the opening of a recreational center in a model village in Windsor Great Park.

Tragedy in Wonderland

If Alice's Wonderland had a railroad, it would probably look like the "Far Twithas been chuffing through the pages of Punch. Under the management of its founder, Cartoonist Rowland Emett, its carriages are apt to be outhouses, its locomotives are overgrown with vines and their mechanism recalls Victorian bathroom fixtures. The Emett Railway is driven by elderly gentlemen with droopy mustaches, cobwebs in their ears, and a quiet contempt for the world about them, When the managers of the Festival of Britain were making plans for a London Pleasure Garden in which fun & games might sprout freely, they decided to transfer Emett's gentle caricature of the Machine Age into reality.

Up & down a 15-inch-gauge, 500-yard track scooted two not-too-reasonable fac-similes of the Emett trains (rechristened "Far Tottering and Oyster Creek"), past weird scenery erected along the line: flatfooted cows, crooked lampoosts hung with

* Greater New York: 7,888,400.

THE FAR TOTTERING & OYSTER CREEK Amid flat-footed cows a caricature of the Machine Age.

A shadow of his old self.

lobster pots. One train had a candystriped engine with a balloon-shaped boiler and an elegant, winged smokestack; the other had spidery wheels, a teaporboiler and potted pink geraniums on top. Midgets dressed up as policemen were hired the first week to direct the delighted crowds which flocked about Britain's own Toonerville Trolley.

One night last week, earrying a gigeline load of passengers, one train was tooding along the single track when from the opsist direction the other approached at trolled the trains—so that only one would be on the track at any time—had gone wrong, as if to demonstrate that Wonderstand will not be governed by electrical the work of the property of the property of the property of the last value of the last Tottering and Oyster Creek, one passenger was killed, 13 jainjured.

Nye's Way

Ever since Aneurin Bevan, labor's hellraising left-winger, guit the Attlee government last April, he has been working on a manifesto which, friends said, would inject new life into Britain's torpid socialism. Last week Bevan unveiled the manifesto. Title: One Way Only. Main recommendations: 1') slow down

rearmanent and try to negotiate a peacerearmanent and try to negotiate appeacetion settlement with Russia: 2 restrain the "breakneck" pace of U.S. rearmaments; 3) resist German rearmanent and Franco Spain's admission to the Atlantic Illiance; 4) maintain veto power over any warlike mission of a U.S. bomber using Hritish bases; 5) use more stringent socialist controls to keep down the cost of living in Britain; 6) establish, with Russian participation, a World Mutual Adi financed by the wicked, equisilist U.S.) to help underprivileged countries. "No one except, a scribt or partism of

"No one except a pacifist or partisan of the Kremlin," explains Bevan, "would

argue that military strength is not needed to deter the rathers of Switer Russia." But rearmanent is proceeding too rapidly and may spoil the chances of a postedil set-tlement. "In 1953... the Americans will tement." In 1953... the Americans will be compared to the control of the control of

Said the Manchester Guardian Weekly:
"Extremely muddled thinking," Said the
London Economist: "Mr. Bevan's brand
of reactionary orthodoxy cannot rest on
anything but poverty of thought," Said
the Daily Mail: "Political nitwitters."

SPAIN

Rumblings

Report from Madrid: Franco is planning a full-scie chinet shake-up, the first in six years. There seem to be three reasons: 1) Franco wants to establish better relations with the democratic world; 2) the Spanish people are increasingly restless under the Franco regime (Tisse, March 19); 3) Spanish businessmen have long smarted under the rule of Minister of Industry and Commerce Juna Antonio of Industry and Commerce Jung and the school of the state of the state of the school of the state of the state of the state conomy in Spain. Rumorphi, controlled conomy in Spain. Rumorphi, controlled conomy in Spain. Rumorphi.

Franco is also reported about to liberalize Spain's restrictive press laws. Steady pressure for this reform is being exerted by the Roman Catholic Church in Spain and its lay organization, Catholic Action.

In Washington, Admiral Forrest P. Sherman, Chief of Naval Operations, announced that he would stop off at Madrid on his forthcoming tour of Western Europe. The British and French Foreign Offices nervously—and publicly—advised the U.S. against entering any military arrangement with Franco Spain.

ITALY De Gasperi Resians

Some sort of shake-up in Italy's government seemed inveilable as a result of the recent elections in which the Reds held heir own, and right-wing parties made substantial gains (Titte, June 11). The Acticle de Gaspert itrin his sails to the new winds merely by reshuffling his cabinet, or would his coalition government collapse after cly years of rule? Last week Treasury Minister Gluesppe Pella resigned tright and extreme left to his anti-initia tionary budget plan. When Pella refused to reconsider, all the other cabinet minsiters handed in their resignations. The

Next step, a request by Italy's President Luigi Einaudi—probably directed to De Gasperi—to form a new government.

GERMANY

Reunion in Berlin

More than 200,000 people streamed into Berlin last week from all over Germany to attend a five-day Kirchentag (church day) assembly of the German Evangelical (Protestant) Church. It was the first large-scale meeting of East and West Germans since the Russians divided the country.

At huge outdoor rallies, with the slogan Wissen Sand Doch Brider (despite everything, we are brothers), the pitgrims listened to sermons. The tone, on the surface, was non-political. This was in keeping with German Protestantism's policy toward Communism: don't seek matyrdom; outwardly obey the authorities; maintain the church organization in the

hope of a new day,
Yet politics simply would not stay out
of sight. Pilgrims from the East Zone,
plodding in faded clothes and ersatz shoes,
gaped at the evidences of prosperity in

West Berlin.

At mass rallies—one in Berlin's Soviet sector, three in the West—the East German pilgrims heard religious words with political accents.

¶ Said Dr. Reinold von Thadden-Trieglaff, president of the Kirchentag: "We do not want to hide the fact that the difficul-

BERLIN ARLIET MEMORIAL was unveiled last week on the great Plate dre Luthracke (Airlift Square) in front of Tempelhof Airfield Terminal. The 63-tl. concrete shaft consists of three area, symbolizing flight, has the names of 75 men (39 Britons, 31 Americans, five Germans) engraved on its base with the inscription in German: "They gave their lives in the service of the Airlift-1948-1949."

ties of conscience of those who are not allowed to proclaim their faith in full freedom weigh heavily upon us."

¶ Said Pastor Martin Niemöller, pointedly: "We must not extend brotherhood only to those with the point of view we like, but to all. We must understand even hardened criminals."

¶ Said a Kirchentag resolution: "Our children . . . do not belong . . . to the state first."

¶ Said Berlin's bearded Bishop Otto Dibelius, who has been more outspokenly anti-Communist than other German Protestant churchmen: "We especially pray for our imprisoned brothers & sisters here and out in the wide world."

The Communists sanctioned the meeting of the East and West Germans—"Germans at one table," was their slogan—in the hope of promoting themselves as the champions of German unity. East German et al. (1997) the statement of the champions of German unity. East German statement of the champions of German unity. East German statement of the champions of the statement of the statement

But by & large, the Communist intention failed. East Germany's Protestants are back in their Soviet prison this week with an eye & earful of democracy, a feeting of solidarity with their Western bretten—and, probably, not a little envy of their freedom.

RUSSIA

Canine Canard

In his rich, full dog's life. Tobey, as mall white French poodle, achieved fame of a sort. The last of a succession of Tobeys owned by rich, eccentric Miss Ella Virginia von Echtzel Wendel, he slept on Come in her house on Manhattan's Fifth Avenue, and ate delicate meals of sliced liver on a tiny table. When Miss Wendel died in 1911, aged 78, Tobey was looked after by two servants, Newsmen dubbed after by the contrast, Newsmen dubbed after by the contrast, Newsmen dubbed systems, while Miss Wendel left an estate of \$30 million, her will made on mention of Tobey. Two years later, the executors of the cated decided that Tobey, having reached a nickly and snappsh nine was the state of the contrast of the cated decided that Tobey having reached a nickly and snappsh nine weterinarians.

Last week the late, long-forgotten Tobey achieved new fame. Moosow Radio Commentator Berko told listeners about the little dog Tobey who lives in a very beautiful, richly decorated house, built by the hest architects in the country. . . His \$75 million . . . The dog sleeps on a goldne bed. It is attended by a staff of 45 servants and sist lawyers." Moral for Moocow: "While the millionaire dog lives in a heautiful private house, the children of the workers, dressed in tatters, roam the street's begging for a piece of bread. Like searching for food in the rubbish."

THE HEMISPHERE

CANADA

Coin Trick

The Finance Minister's Patliamentary Assistant Jimmy Sinclair remembers now that he did not have much hope of success when he was sent to Yugoslavia-last year. His mission was to collect a debt (32:26,000) owed to Canada for postwar relief. To his pleased surprise, Marsel Tito amiably agreed to pay bacrshal Tito amiably agreed to pay bacrshal wowed Sinclair with his coin-trick joke atout Stalin.

Tito extended his hands, placed the opposing fingertips together, except for the middle fingers which were bent so that the backs of their second joints staved in contact. Then he put a coin between his thumbs, "This is the way Britain gives asallowing the coin to drop easily. Then, just as easily, he dropped the coin from between his index fingertips; that, he explained, represented the ready generosgers in the same position, Tito pressed the coin between his third fingers. He tried but could not draw them apart: the coin could not be budged. Sinclair, when he, too, tried the trick, found it impossible to part his own third fingers, "That," said Tito, "is the way Russia gives assistance."

Ever since then, Yugoslavia and Canada have been getting along better & better. The two countries have just cleasted their respective envoys to the rank of donald will be shifted from the embasy in Rio de Janeiro to the new one in Belgrade; for Yugoslavia, Minister Rade Philacevia for Kitswa has been promeed). To men a gift of 125 tone of codish to Titoland.

Last week only one dark cloud, as yet no bigger than a man's hand, hovered on the horizon of Yugoolavia-Canada relations. Tivo has notified Ottawa that one Radan Radican Grujicie is a refugee in Canada and should be sent back to his homeland to stand trial for 1.000 political murders, Grujicie, according to Belgratie, was chief of Hitler's Gesupon is Serinis, was chief of Hitler's Gesupon is Serinis, executly Grujicie lived in a Toronto rooming house; his present whereabouts are unknown, except perhaps to the R.C.M.P.

If Canada refuses to turn the wanted man over to Tito, the cordial new relations will suffer; if Canada extradites him, Grujicic may not get a fair trial. Grujicic, in Tito's hands, will be like the coin be-

tween the third fingers.

MANCHA, meaning "Spot," is President Juan Perón's favorite horse. The seven-yearold gelding, a strikingly marked crossbreed bought from the Argentine Army, is shown bearing the President during the July 9 Independence Day parade in Buenos Aires.

Reciprocity

Canada this year is spending \$2500 milllion in the US. for defense equipment. The US. has been planning to buy less than \$2500 million worth of military supplies from Canada. Though Defense Minsiere Brooke Caston recently said that arrangements for their common defense.¹² the unbalanced trade in military items has long been a thorny issue to officials in dollars-short Canada. 10

Chief stymic to reciprocity has been the U.S., "Buy American" At of 1933, which hars purchase abroad of any milistary matériel that can be procured at home. Under a loophole in the act, permitting "exceptions" in the nation's best interest. Washington early in 1950 authorized the spending of \$92 million a year in Canada, "After the Korean War hock out, the fixure was boosted to 8x00 million. Last week the Defense Department raised the celling to \$500 million.

GUATEMALA

Under Western Eyes

July seems to be the month for violence in Guatemala. In that month of 1940, the assassination of Colonel Francisco J. Araña, chief of the armed forces, sparked a brief, bloody revolt against the left-wing government of President Juan José Arévalo. The following July, anti-Arévalo. The following July, anti-Arévalo. The thought of the colonel off another uprising. Last week usain, there were gunire and bloodshed in the streets of the capital.

"Enmies of the People." Trouble bean when Galitiel Alvarnde, director of the National Orphanage and an avowed Communist, dismissed three Roman Catholic nuns of the Sisters of Charity, which founded the orphanage in 1867. A mainmade up largely of market women and miveraity students broke into the orphanage, beat up Alvarado and his asides. Communist, pressured Ortubes.

Next day, in the name of President Jacoba Arbae, who took over from Arivalo last March, the government radio invadesta threat: the "enemies of the people" planning the overshrow of his overmment would be given "a lesson they would never forget." Undeterred, a crowd of 1000 gathered in front of the National Palace, chanted the national anthem, the properties of the control of the properties of the properti

Police tried to break up the demonstration by firing rifles into the air. The crowd held its ground. The police lowered their rifles and fired at the demonstrators.

Screaming, they stampeded, At least five ware billed come for younded.

"To Save the Nation." President Arbenz declared a state of siege, suspended constitutional guarantees for 30 days, banned gatherings and meetings "likely to affect public order." Then, in a gesture to

anti-Communists. he dismissed Marxist Alvarado, appointed as the new orphanage director Roman Catholic Ernesto Coñño, who reinstated the three puns.

The Association of University Students called upon Congress to "save the nation " But some anti-Communist Guatemalans were beginning to wonder whether Arbenz wanted to save the nation from the Red totalitarians, No Communist himself, he seemed to be a prisoner of the Communist bureaucrats, politicos and union bosses who grabbed power during the Arévalo regime. Said a student wounded during last week's fray: "We Guatemalans must face up to the fact that ours is the only country west of the Iron Curtain where peaceful anti-Communist demonstrators are dispersed by government bullets,"

BRAZIL

On the Warpath

To the cabaclas (tubber-tree tappers and Brazil-nut satheres) who live along tributaries of the Amazon, the Caispo Indians are but medicine. Savage and naked, they lurk in the jungle until the men in cabacla settlements leave for the day's work. Then they swoop down, killing creyrous but the girls, whom they kilding. If they wish faming arrows, like Sloux attacking a covered-wagon train. Says an old trader: "The best thing to do when you see a Caispó is to shot first."

To the Chiapós, on the other hand, the chaelotar as sinister members of a light-skinned tribe which threatens their tropical hunting grounds and may rightfully be attacked. In this view they have a virtual ally in the powerful Indian Protective Service, a federal bureau. So considerate is the Indian Service of its wards that it has even tried to have the government forbild shooting of Indians in self-defendance in the Indian Service of the Wards and the Service of the Wards a

Last week, after many months of increasing Caiapó depredations, the State of Para Chamber of Commerce sent an angry telegram to Brazil's Congress, "transmitting the intense clamor of the state's population against the murdering of rubber tappers and nut gatherers by the Caiapo Indians." It noted that "at a time when Brazil needs its rubber for its economy. security and defense," production in the area had dropped from 2,000 to 400 tons a year as frightened caboclos refused to venture into Caiapó territory. Worse, the Indians, in addition to bows & arrows clubs and lances, were using Winchester rifles supplied to them by renegade rubber just as firewater and firearms lous fur traders. The telegram hinted that the Winchester ammunition came from the Indian Service; recently at a Service post police seized 16,000 rifle bullets.

Unperturbed, the Indian Service answered: "When nuts and rubber pay good prices, white men invade Indian territory. From the position we take against exploiters and invaders comes the animosity against our service."

The hottest combination that ever hit the screen!

HOWARD HUGHES presents

ROBERT MITCHUM JANE RUSSELL HIS KIND OF WOMAN!

Military demands have made civilian and soldier interdependent, inteparable. Yet a man may well wonder how he contributes to expanding our national strength at this time of mobilization, if he spends his whole day naking lacking soils. Biear/Jonate of soils is one of the imajor products, by tounge, of DiAMONO ALKALI and the men who make it never know how much will go into baking cookies for civilian delight or into charging fire extinuishers for civilian delengant.

Every chemical DIAMOND makes is used in both civilian and military goods. Bicarbounte of souds can become whatever men want it to become, food for Korean orphans or an aid in processing military leather. The determining factor is man's purpose which, after all, is a matter of man's desire. That's the most hopfull hing about present-day expansion of the chemical industry—it can all be diverted to wiping out war's causes, to helping create world-wide abundance, by a mere change of heart.

PEOPLE

Jigs & Judgments

The wife of a Tahitian planter who had entertained Voyager Thor Heyerdohl and friends at a hula party in Papete decided that the dance was strictly a private affair, never meant for public eyes. Since Heyerdahl filmed it, then used a few seconds of the shot in his movie Kon-Tiki, she sued for \$510,000.

Shirtless and full of aloha spirits, Cinemactor Zachary (Born to Be Bad) Scott walked into a Honolulu penny arcade where a bemused crowd gathered to watch him shimmy through a barefoot hula. The show ended when cops arrived, charged Scott with being drunk, beddled him in

jail for six hours.

A Los Angeles judge decided that silent Cinemactress Dolores Costello, 45, one-time wife of the late John Borrymore, had grounds for divorcing her second husband. Dr. John Vruwink, 6c, Said Dolores: "I got what I would call the monastic treatment. He wouldn't speak for days at a time." Even worse, she said, he pushed her around the kitchen in one row, and she got her head causht in a swingine door.

Federal Judge Benjamin Harrison heard

the income-tax evasion case against Gambler Mickey Cohen, sentenced him to five years in jail plus a \$10,000 fine, then commented: "You're not as bad as you have been pictured. Perhaps more of us worked been pictured. Perhaps more of us worked was "That conclusion hotted up the Tennessee temper of crime-busting Senabave." That conclusion hotted up the Tennessee temper of crime-busting Senative and the properties of the properties of the pen given a heavier sentence "instead of a pat on the back." Ever hear of a bank that gave money away?

Every day, a bank gives away tens of thousands of dollars in exchange for checks drawn on other banks. These checks are worthless pieces of

paper until they're cleared at a central clearing house. Until that time, the bank has literally given its money away!

It's vital for a bank to keep its books

balanced by clearing these checks in the shortest possible time.

Yet their central clearing houses are hundreds of miles away from many banks! What do they do?

They make a wise investment! They ship their checks the fastest possible way -by Air Express!

Whether your business is banking or ball-bearings, here are the unique advantages you can enjoy with regular use of Air Express:

IT'S FASTEST — Air Express gives the fastest, most complete door-to-door pick up and delivery service in all cities and principal towns, at no extra cost.

IT'S MORE CONVENIENT—One call to Air Express Division of the Railway Express Agency arranges everything. IT'S DEPENDABLE - Air Express provides one-carrier responsibility all the way and gets a receipt upon delivery.

IT'S PROFITABLE—Air Express expands profit-making opportunities in distribution and merchandising.

For more facts call Air Express Division of Railway Express Agency.

The old idea was to the pix Physiologically, I am sure, this was correct."

The Pigeons of Paris

People in Paris were coming down with something like parrot fever?—but they had not caught it from parrots. Dr. Pierre Lépine, the Pasteur Institute's virus expert, spent two years tracking down the culprit. Last week he had it: the plump Parisian pigeon.

Fortunately, the disease was taking a far milder form than in Paris' big outbreak in 1893, when there were 16 deaths among 31 cases. Most recent victims thought they had nothing more serious than influenza; the only deaths have been among elderly invalids. Even so, Lépine's report fluttered the dovecots of the Ministry of Health.

Lépine told the ministry there was only one thing to do: reduce the number of pigeons. This, said he, would be better for both the people and the monuments of Paris. But he had reckoned without the pigeon lovers. The ministry began to get threatening letters. Said Lépine sadly: "There are some who would rather see men die than pigeons."

Where the Blue Begins

Pm in love with you, Camp Sweeney, For your deeds so true; Perseverance, faith and courage Help our tests stay blue.

The 79 youngsters who shrilled this paean were singing about urinalysis. In their camp for diabetic kids (6 to 18) near Gainesville, Texas, every one of them knows that when the test turns out blue, it means no sugar in their urine; red is bad.

Most of the kids, like ten-year-old Patsy Byrnes, have been taught to make their own tests and give themselves insulin shots. One morning last week she woke as usual at 6:45, padded down her dormitory

* The Maoris, once supposed to be on their way to extinction, have doubled their numbers (from 50,000 to 100,000) in 30 years.

† Psittacosis, so called because the disease was first detected in parrots. Now regarded as a form of ornithosis (bird disease), to which many birds are subject. to the lab. There she made a sugar test of her urine, screwed up her freekled face in a grimace as the reagent turned brick red —four plus. She fished a needle from the sterilizer, carefully measured out 26 units of insulin, and expertly injected it into her thigh.

Then she went to breakfast: corn flakes, scrambled eggs and bacon, buttered toast and milk. But she used saccharin instead of sugar on her corn flakes, and every item had been weighed to the gram, to match the diet calculated for her by

After breakfast, Patsy went for a 45minute ride on a pony named Dixie. Next, there should have been a swim, but Patsy had fallen and skinned her knee while square-dancing, so she went to the archery

PATSY BYRNES A carrot at bedtime.

court instead. Before lunch, Patsy made another urinalysis (still red) and went in for another measured meal of meat & potatoes, asparagus, corn muffins, salad and apricot whip.

Between an afternoon nap and lightsout at 9, Patsy played more games, took part in the junior campers' show, acting out Jack Be Nimble, made two more urinalyses. The last was still positive, so for a bedtime snack she only got a carrot; if her test had been blue, she could have had cookies and milk.

Among the campers at Sweeney, Patsy Byrnes's diabetes, which flares up easily, is about average. More fortunate youngsters are able to cut down their insulin dosage early in the three-month camping sesson or even cut it out entirely. Nearly all of them are vastly improved long before the end of the season.

Dr. James Shirley Sweeney, 54, a specialist in metabolic disorders, started the camp two years ago to help diabetic chil-

Says Dr. Sweeney, who shuttles between a Gainesville hospital and the camp: "I wish we could have a thousand of those kids here.'

Jungle Yellow Jack

The Indians of Panama used to say: "When the monkeys die, the men will vomit black"—and die themselves, of yel-low fever. Then came Gorgas and Goethals, and for 40 years the country seemed free of the scourge. Doctors believed that they had banished it entirely from the Americas; they scoffed at the Indian legend about the monkeys.

But all the time vellow jack was lurking in the jungles. The dread mosquito carriers spread yellow fever from animal to animal and from animals to the few men who ventured deep into the forests. The doctors and engineers who cleaned up the cities and labor camps of Panama never suppressed the guerrillas in the jungle.

Last week the Pan American Sanitary Bureau had to admit that the experts still do not know how to stamp out jungle yellow fever, though they are learning more & more about it. It is the same disease that Gorgas fought: only the carrier mosquito is different. The only way to check it is by vaccination. Any farmer, woodcutter or orchid hunter going to town for a weekend with the virus in his blood may start an epidemic among people who have not

This year Brazil alone has had more than 4,000 cases of yellow fever, 500 deaths. Across the Andes in Ecuador, supposedly free of the disease since 1929. there have been 60 cases, 25 deaths, Even Panama's record has been spoiled: seven

To learn more about the jungle carrier, sanitary experts have set up dozens of forest stations in Panama. There, well vaccinated Indians display themselves on outdoor platforms, invite mosquitoes to bite them and be trapped for science. Well paid by Panama standards (\$70 to \$90 a month), the Indians consider it nice work.

Mail Hormones

Testosterone, a male sex hormone, is a fine thing when properly used. But the Food & Drug Administration warned this week that testosterone, ignorantly used can stimulate the growth of cancers. The FDA was delighted that federal courts have barred two Los Angeles firms from peddling hormones without prescription.

Men in their 40s and 50s are especially subject to cancer of the prostate. Yet men of that age, seeking sexual rejuvenation. are the very ones that fall for mail-order promoters. And misuse of testosterone may

actually cause sterility,

TIME, JULY 23, 1951

Also under the court ban; sale of unprescribed female sex hormones (estrogens). Improperly used, said FDA, these may cause serious injury to women's reproductive organs.

MUSIC

The Koblenz Idea

Plenty of European cities are luring tourists with serious music this summer, but Koblena (pop.: 92-000) has a different idea. Koblena offices a big ponton stage on a quiet inlet of the Rhine, bleachers ashner tered with Coa-Cola signs. It promotes itself as "The City of the Operetta Fest-val." The single operetta to be staged all this summer: a fazze-duty version of Journal One Wietler.

Koblenz keeps it largely a home-town

ing boat. As the star attraction, four water maidens push a water-borne platform on which a trim, silver-skirted ballerina does a lotus dance. The whole thing ends with singers diving off the stage into the river, and with blubbery "eunuchs" being tossed out of boats. The Rhine takes it all with hardly a murnur.

So far, the show has been selling out every night. The attitude of the Koblenz city fathers: let Edinburgh, Salzburg and Bayreuth have the heavy stiff. At the present rate, the City of the Operetta Festival can expect 100,000 customers by the end of summer.

"A THOUSAND AND ONE NIGHTS" ON THE RHINE
Let Edinburgh, Salzburg and Bayreuth have the heavy stuff.

production. The local Rhine Philliammonic, a dopine confessar, as the musical backbone of the performance. Koblens' young singers and boulding ballerinas make up singers and boulding ballerinas make up stern, and the sites, male & female, of the Poseidon Swimming Club Perform in the aquacade act. For the top roles, some talent had to be imported. Of one guest performer, a Koblens official proudly reported: "Oh, the official proudly reported: "Oh, the sometimes even sings on the radio."

The basic idea seems to be that it doesn't matter what the boys do to Strauss so long as they keep it lively. The rotating stage is decked out with a gay jumble of parodas and minarets. Arab palaces and Venezian gnodals landings. Costumes flash across the stage with colorful irrelevances usultans fook like Dalai Lamas, girls in belly dances, men gotten up as Chinese coolies chant Viennee versions of Moslem

music.

The acts are as cheerfully muddled as the setting. The "spirit of Aladdin's lamp," a hefty chorine, turns Aladdin into a white spitz dog, which pops out of a pass-

Destiny Unknown

When he was 16, Vienna-born Arnold Schoolberg decided to become a professional musician. Nine years later, in 1890, he completed a string sextet, Transfeured Wight, a melodic, romantic piece, which was to be one of his few works familiar to concertgoers. Critics applauded the newcomer.

From that time on, Schoenberg continued to attract attention, but it was increasingly of a different kind. He became the apostle of a musical-intellectual game which made him the most controversial innovator in 20th Century music.

New Hormonies. Where other composes were satisfied with the conventional scale of seven basic tones (do, re, mi, la, al, la, this, Schenberg instated on discarding the control of the con

THE PRESS

Headline of the Week

In the Toronto Globe and Mail: ARMED FORCES AGREE WOMEN NECESSARY

Correspondents at Bay

The newsmen covering the Korean war landed noisily on the front pages themselves last week, found it an uncomfortable feeling to be principals in the news, as well as its reporters. But their strange role brought a quick reward: General Ridgway skillfully used the issue they had raised to the full advantage of the western world (see WAR IN ASIA).

The trouble in the press corps began when correspondents, covering the U.N. negotiators' take-off for the preliminary Kaesong meeting, were barred from the

BRIGADIER GENERAL ALLEN From a foul-up, quick rewards.

helicopter area by a barbed-wire fence and armed guards. There was no press camp, no food, and information was scarce.

At the briefing session that night, an officer on Ridgway's information staff conceded that "conditions are not satisfactory to the press corps . . . But the press was not fat Kaesong | because my orders were that they shouldn't be." The admission threw the press into an angry uproar. New York Times Correspondent George Barrett bellowed; "Who is responsible for this foul-up?" Then as Chief U.N. Representative Colonel Andrew J. Kinney confirmed that the Communist press was represented at Kaesong, the session broke into a tumult of charge and countercharge. Why couldn't U.N. reporters go? When Kinney admitted that Kaesong was really a Communist-held city, an Army censor broke in to warn correspondents not to use the information. Snapped Chicago Daily Newsman Fred Sparks: "I

regard this information as so important that I will not abide by your censorship. The censor's ruling was reversed,

Into the free-for-all jumped Ridgway's new top information officer, Brigadier General Frank A. Allen, Though a good combat officer, Allen's record as a P.R.O. does not inspire confidence in war correspondents, As press chief for General Eisenhower during World War II, he was blamed for holding up news of the German offensive at the Battle of the Bulge, He also held up the news of the German surrender and war's end until the A.P.'s Ed Kennedy defied the ban and broke the story. Now, Allen assured the newsmen that the U.N. delegation would insist on press representation at Kaesong. Said he: "We hope for equal coverage with Tass men." Reporters in the room groaned.

Double Cross? Next day, General Ridgway himself jeeped over to try to talk to the newsmen. He explained that they could not go to Kaesong until the talks were really "on track." Meanwhile, the matter of press coverage had "high priority," But at the next briefing session. things were worse than ever. Army and Navy officers did such a bad job describing what had happened that it was plain neither had been at the second truce meeting. A few reporters, who had been drinking too much for their own good, hooted derisively. U.P. Correspondent Earnest Hoberecht angrily cried; "General Ridgway assured us that the briefing officers would attend the conferences. I say we've been double-crossed."

The correspondents argued that much more than mere journalistic vanity was at stake. The Reds were winning an important propaganda victory. The U.N. negotiators were coming back from the truce meetings so tired that they were not giving their information officers full, detailed stories of what had occurred. Instead of U.N. correspondents in Korea were being told by their Tokyo offices what was going on; Tokyo was getting it from Communist broadcasts. When one correspondent told that to General Allen, he replied: "But the Communist press isn't free, All

it puts out are lies.' Finally the Army agreed to take five photographers to Kaesong, but ordered them to rip off their press shoulder patches so that they could pass as "photographers accredited to the U.S. Army." While a technically accurate description, correspondents thought this a clumsy subterfuge. At last General Allen made the announcement that 20 newsmen would be taken to the next meeting at Kaesong.

Payoff, When the Reds refused to let them in, thus breaking off the peace talks, many a newsman had second thoughts. at being excluded from Kaesong wanted no part of the responsibility for halting negotiations. They were ready to drop all attempts to go to Kaesong even though General Ridgway stood firm, even broad-

ened his demands on the Reds. But at week's end, when the Reds gave in to General Ridgway, it was plain that the correspondents' stubborn stand had led to

Union Labor Saver

The powerful, oo.oo-member International Typographical Union last week announced that it will start a string of newspapers. Within a few months, said the LT.U., it will start publishing daily tabloids in nine cities.* In each city the union has had trouble in recent strikes.

The purpose of the papers, says L.T.U. President Woodruff Randolph, is to "keep news free." But the L.T.U., which knows more about printing newspapers than editing them, really has its eye on another target. With costs rising, newspaper failures and mergers increasing, many an L.T.U. member has found himself frozen out of a job. Such labor-saving devices as etletypesetter machines (ThuK, May 7) also worry L.T.U.; all the cities slated for the new dailies use teletypesetter user the state of the teletypesetter user the teletypese

If the I.T.U. hopes to make a success of its papers, it will have to do better than it has done in the past, when it lost an estimated \$2,000,000 setting up papers.

100 for Reuters

With the release of 100 homing piecons from its London headquarters and a banquet for more than 1,000 notables, Rener's ness service, last week celebrated its longer to the last control of the last control

In the early days of Reuters, the foreign correspondence of most newspapers consisted of letters sent by ship, so Reuters had no competition in Britain when it set up its own cable service. By the time Founder Reuter died in 1800, the London Sun proclaimed that "no daily newspaper could afford to dispense with Reuters' with Reuters' with Reuters'

service . . Mouthpiece of Empire, Despite its reputation, Reuters soon slid into poor financial shape, as cable companies had capbusiness. Long a mouthpiece of the British Empire, it was glad during World War I to take subsidies from the British government to spread propaganda, and Sir Roderick Jones, Reuters' chief and its biggest stockholder, was happy to double for a time as British Director of Propaganda, Reuters' reputation as the "official" government news service soon became an added handicap, and by 1926. Sir Roderick was forced to sell a controlling interest in the agency to Britain's A.P. Boss Kent Cooper expanded his in-

Now— a single standard of comfort!

Time was when women had a monopoly on comfort. Men struggled through seething summers clad in heavy fabrics... squirmed through steam heated winters dressed for the old open fireplace days.

But not your present day modern-minded gentleman. He demands equal rights to comfort—and dresses to suit his surroundings—in rayon.

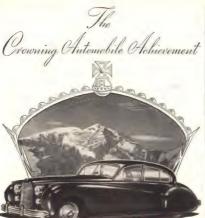

Come hot weather, he's quick to take advantage of rayon's coolness and slips into an air-breathing rayon topical. During the cold months the average 70° temperature maintained in most homes makes an airtrapping rayon medium-weight a natural choice.

How come this new comfort? Warmth and coolness are not a matter of fiber but of fabric construction. Being man-made, rayon can be engineered to do both jobs superlatively well. Moreover, rayon brings its own unique values to men's clothing. It makes possible subtle colors, smart tailoring qualities, interesting surface effects at a most reasonable price.

But only wearers of rayon suits can really appreciate them. Wear one yourself and see how comfortable life can be! American Viscose Corporation, 350 Fifth Avenue, New York I, N, Y.

Have you heard how Continental developed the popular low-pressure aerosol can-and-valve?

Originally all aerosol products were packed in heavy steel "bombs." These are pretty good-but they can't help being expensive. So Continental research people said:

"Why don't we find a way to put these efficient aerosols in an inexpensive, disposable can? Then more people could afford the convenience of self-spraying insecticides, deodorants, paints, waxes and other products."

Our scientists went to work. They soon discovered it wasn't necessary to use aerosol "propellants" that developed high pressures - around 70 lbs. per square inch. A pressure of 35 lbs. worked just as well for many sprays, and didn't require a heavy steel "bomb" structure for the package.

So Continental researchers developed a proper combination of materials to give a satisfactory low-pressure aerosol. Next they tackled the problem of the container itself. Because of their experience with other cans designed to hold pressure, they knew just what kind of can to build.

But the valve for a low-pressure aerosol presented a brand-new problem-and without the proper valve, the whole idea might have flopped. After several years of intensive research, the engineers came up with the answer-the built-in "finger-tip" valve.

Presto-the Continental pressure aerosol can was a practical reality, and in just a few months it appeared in stores all over the country, packed with dozens of convenient, useful products,

SPORT

Million-Dollar Horse

Citation knew he was going to race that day. He failed to get the usual hay in his late morning feeding. Said Groom Dan Barnette: "He squealed and reared up in his stall just like a kid after being told he's going to his first circus." It was a good sign. Citation was ready to run for the \$Too.000 Hollywood Gold Cup at Inglewood. Calif.

With half a mile to go in the mileandaquarter race, the mahagany-colored stallion took the lead. Under Jockey Steve Frook's gentle urging ("I waved the stick at him to shake him up a little"), Clarical engethered his stride and few way from lengthered his stride and few several engths, thanks, in part, a created provided to the string of the string of the string 122. It was like the old days. But this victory, Big Cy's and in 45 starts, was something special. It brought Citation's Stricks, "one" for Cultured Farm. Stricks, "one" and the first milliondellar horse.

Almost lost in the uproar over Big Cy's victory was the fact that his stablemate Bewifth collected \$20,000 for finishing second, and gave Calumet Farm the double distinction of also owning the greatest money-winning mare of all time. Bewitch's lifetime earnings: \$462,605.

Trainer Jimmy Jones figured that Citation, now six, might have a few more arcselet in him before he retires to stud: "I'm going to see how he feels and then I'll know whether well run him again. He's in good shape; there's no reason why he shouldn't run a few times more." But Jones does not expect Citation to win another million.

Sugar's Lumps

World Middleweight Champion Sugar Ray Robinson had fought six fights in six weeks, gadded about Paris and made innumerable personal appearances (Trans, June 11 et 2eq.). His wife Edna Mae was covertained and overfought." Meanwhile, Britain's Middleweight Champion Randy turpin, on the eve of the fight of his life, made a soberly restrained prediction: "I him I have a chance." Nevertheless, the odds were 3-1 on Sugar Ray when the lin London last week.

Turpin crowded the champion from the opening bell, getting the better of the infighting, jabbing and hooking to keep Robinson constantly off balance. Not until Round Three did Robinson land a solid punch, a bolo left to the jaw. "Get him. Sugar!" shrilled Edna Mae. But 31-year-old Sugar Ray could not get going. His timing was off,

his punches were missing the target, his ballet footwork was out of rhythm. In a seventh-round clinch, Turpin butted an ugly gash over Robinson's left eye. At the sight of blood, the crowd sensed an upset and howled for it. Edna Mae changed her

line. "You can do it, Sugar I You can do it." Disoppeoring Dynomite, Sugar tried. In Rounds Nine and Eleven he banged Turpin around, but there was no stopter of the sugar tried to the sugar tried that the sportwriter. "I still haven't seen any of that dynamite I we been writing about." By Round Twelve, it was obvious tat only a lucky knockout punch could save Robinson's title. Gred Edna Mae: 15, Turpin was pummelling the lived chambigger and better in consequence. Europe had risen from the gutter and thrashed the Prince of the Dollar Empire... Morale rises... Even the Government becomes our Government and can be sure of re-election on such a morning after."

The Daily Mirror's 'hokum' crack was a reference to Rohinon's training quarters at Windoor's Star and Garter Hotel, where thousands of curious Britons, acting for all and crowded for a glimpse of Rohinon and crowded for a glimpse of Rohinon and his flamboyant 14-mm entourage or a peek at the gaudy fuchsia convertible's parked outside. Turpin: 23, son of a British Guinana and a white British mother: Castle in North Wales.

Big Week

At baseball's midseason mark last week, the big news was the resurgent Boston Red Sox. Moving in against the first-place Chicago White Sox for a four-game series, the Red Sox needed to win three to take the league lead. They did, but only after playing one of the longest, most exciting marathons in baseball history.

exciting marathons in baseful instory. Some coacoo fans sat our the edge of Red Sox finally won, after staving of Chicago's two-un rally in the ininit hining. Clyde Yollmer, the least celebrated member of Boston's all-star outfeld, won the game with a Seventh-inning home van tighter, At the end of nine innings the score was 4-4. Not until the 17th inning, the longest night game in American League history, did the Red Sox win, 5-4. Clyde Vollmer, ove in the winning run:

Next night the incredible happened: after 18 innings, around 1 a.m., the score was still tied, 2-2. In the first half of the 19th, the Red Sox scored two runs. But the White Sox came storming back with three and won the game, 5-4. It had taken the teams a record 36 innings to settle two successive games.* After that glorious comeback, the limp Chicago fans expected their heroes to sweep the fourth game for an even break. The White Sox led, 2-1, going into the ninth, but lost, 3-2. The buster-upper: Clyde Vollmer. It was the sixth time in seven games that he had knocked in the winning run. The Red Sox, pre-season pennant fa-

vorites with the majority of baseball writers, were finally beginning to act as adverthe whole story: the Red Sox have power to spare with Williams, Vern Stephens, and Billy Goodman, the league batting champion. The team is better off this year in "bench" (i.e., reserve) infield strength supplied by Lou Boudreau, deposed Cleveland manager. Day after day, playing where he is needed most, Boudreau has sparked the Red Sox at bat and afield. Said Manager Steve O'Neill after the tight Chicago series: "The whole team has that desire to win and they're hustling and fighting all the way. They feel they belong on top-and that's where they hope to stay."

In the Shadow

Harry Hellmann was a tall, husky man (61, 11, 195 hs.), a outfielder (mainly for Detroil) who spent 13 years in the major leagues cowing opposing pitchers. He won the American League batting champion-ship four times, one season hit .403. His lifetime average was .342. a mark bettered by only six other players. T

Previous record: 33 innings, by the N.Y. Vankees, against the Chicago White Sox and Cleveland Indians, in 1018.

† Ty Cobb (.367). Rosers Hornsby (.358), Dan Brouthers (.348), Ed Delahanty (.346), Willie Keeler (.345). Tris Speaker (.344). Babe Ruth and Jess Burkett also hit .342.

HARRY HEILMANN (1920)

When his high-league days were over in 1933, Heliman made a new career as a 1934, amouncer on Detroit radio stations, But his great ambition, election to basehall's Hall of Fame in Cooperstown, N.Y., always cluded him, Lesser men made it; Helimann's misfortune was that he had played in the shadow of such tilans as Tris Speaker, Rogers Hornsby, Babe Ruthand Harry's own teammate, Ty Cobb,

Recently, hearing that Helinann was seriously ill, Colbs wrote to several of his haseball-writer friends, urging them not to bypass Harry in this year's selections. Last week New York Times Columnist Arthur Daley printed part of Cobb's letter, agreed that Helimann's election was, along overduc. The appeal came too late. At last week's All-Star game in Detroit, 5,000 flans tool and observed a moment of silence. The day before, Harry Helimann, 50, had died of cancer in Detroit.

Man Overboard

The racing sloop L'Apache, a 724-foote, was running in second place in one of the world's longest yacht races—from Los Angeles harbor to Honolulu, At dawn one day last week, L'Apache's boom tackle broke. It had to be repaired under way, with 8-ft, seas running, Precious time was wasting, Crewman Ted Sierks, 40, on ex-Marine and photographer, was braced against the rail, trying to get the fractious boom under control. The rail broke and Sierks slid into the sea.

A life ring with knife and flashlight attached was thrown to him, but before the crippled L'Apache could come about and work lack to the spot, Sierks was out of sight in the vostness of the Pacific. Six nearby yarks converged on the area when messare: "Man overhoard!" From Hondblus, 800 miles way, the Navy sent ships to the manhunt: an escort carrier, four destropers, three destroper escorts. An airdestropers, three destroper escorts. An air-

rescue B-17 droned out from the Army's

Sierks, gripping the life ring, found bimself in one of the most sppallingly lonely spots a man could imagine. He soon gave up hope, but found that he could not give up trying: "It's hard to drown when you know how to swin." That first day, sharks pestered him. He shilled one: "I grabbed his stail, flipped him over and ripped up the belly with my knife." He had plearly of time to think. "I thought about how I appear to think the time I had wasted in my life." At sunrise the next morning, the sharks came back.

Aboard the destroyer escort Douglas A. Morro the captain pledged a \$50 reward for the first man to spot Sierks. The Navy, which knows how long a man can last in the open sea, ordered the search ended at 2 p.m. At 1:15 two scamen sighted a bobbing blond head, lost it, then picked it up again.

Sierks' ordeal had lasted 30 hours and 15 minutes. He would not soon forget it. Said he: "Now that I've been rescued. I figure there must have been a reason. There must be something for me to do. I'll have to try and find out what it is."

Who Won

¶ New York Yankee Pitcher Allie Reynolds, in the third no-hitter of the season, over the Cleveland Indians, 1-0, on Gene Woodling's seventh-inning home run; in Cleveland. The losing pitcher: Bob Feller, who had turned the trick himself (for the third time) a fortnight before.

¶ The underdog National League team, the All-Star game, with four home runs, over the American League, 8-3; in Detroit, d British Miler Roger Bannister, Britain's Amateur Abletic Association championable, with his best time ever, and best in the world this year; 4,0-7Å; in London, the World Champion Rocky March Rocky March Rocky March Rocky March Rocky March Rock 1970s, with a crushing sixth-round knockout; in New York, Marciano's showing put him

in line to take on the winner of September's heavyweight championship fight between Ezzard Charles and Joe Louis.

¶ Tony Trabert, the National clay court tennis title, in an upset over U.S. Champion Art Larsen, 6-8, 2-6, 6-4, 6-3, 8-6; in Chicago.

Wictor Seixas, the Spring Lake invitation tennis tournament, over Bill Talbert, 6-2, 6-3, 6-3; in Spring Lake, N.L.

6-2, 6-3, 6-3; in Spring Lake, N.J.

¶ The U.S. yacht Malabar XIII, the
4,400-mi. international race from Havana
to San Sebastian, Spain; in 28 days, arriv-

ing 48 hours ahead of its nearest rival.

¶ Palestinian, the \$57,100 Brooklyn Handicap, one of U.S. racing's oldest stakes (first running: 1887), over Sheilas Reward, by a length; in New York.

¶ David Stanley of Los Angeles, the national public links golf championship, over Ralph Vranesic of Denver, I up on the 38th hole; in Milwaukee. ¶ Stella Walsh, 40, her own national pen-

tathlon title, with a record 1,932 points; in Berkeley, Calif.

Q What famed scientist is closely linked to the brewing of beer?

A Louis Pasteur, who evolved "pasteurization" through observing the action of yeast.

In 1876 Louis Pasteur published a scientific treatise entitled "Studies on Beer." In it he described a very important discovery he had made—that fermentation is caused by tiny, single-celled plants called yeast.

Pasteur's efforts to find a means of controlling these yeast organisms led to the discovery of the process we now call "pasteurization."

More about the historical, economic and social role of beer is presented in the book, "Beer and Brewing in America." For a free copy, write to the United States Brewers Foundation, 21 East 40th Street, New York 16, N. Y.

United States Brewers Foundation... Chartered 1862

THE THEATER

Disenchanted Evening

On records and on paper, a Paris Opéra basso, Roger Rico, seemed a natural to enter Broadway's South Pacific in the role that the Met's Exio Finange created two years ago. After listening to his reords and noting that he would be the first real Frenchman to play the hit musical's French planter, Co-Froducers Richard Rodgers and Oscar Hammerstein II sent for Rico, auditioned and bired him.

Rico's seven weeks of rehearsal posed a special problem: he speaks no English. Patiently, with the help of a wire recorder, he learned his lines phonetically while studying a French translation to learn

MARTHA WRIGHT & ROGER RICO With the help of a wire recorder.

what they meant. Last week, when the time came for Rico to begin his 15-month contract run in the show. Manhattan reviewers were invited to the debut.

While adming his voice, the critics While adming his voice, the critics while a politic claim. Also, as performance with a politic claim. Also, as the property of the critical political political

At week's end, however, even with the second team playing, South Pacific's standees were still turning up as regularly as its cast, and the end of its phenomenal popularity seemed nowhere in sight.

For news of Pinza's latest role, see CINEMA.

ight not be such a crazy way to hunt a site for your new plant by don herold

There may be quail today on the site of your future new plant or branch.

A lot of new factories are going out into the country, these days—away from the congested cities. They're going out where plants can sprawl economically over many acres instead of rising expensively up into multistory construction. They're going out incidentally, where "incurrity is served." Out (I hope) somewhere along the B&O.

B&O Industrial Development (plant locating) men have found sites for over a billion dollara, worth of plants in the past several years. The B&O is a bird of a bird dog for flushing out new plant locations.

You may think it's the wrong time or too early to talk to anybody about the location of your new plant. But the me sell you on the wisdom of calling in a B&O man schie your plant in any help you think along better lines. He can show you actual photographs of many new, modern plants. He knows facts and figures about different types of plants and different locations.

The B&O man will be a clam about what you tell him. He knows you don't want your competitors to hear what you are thinking, and he knows

The heart of America's markets and the treasure land of the "lion's share" of American industrial resources.

how to hunt sites without tipping off prospective sellers.

Here are 11 basic considerations in plant location: power • Labor • WATER • FEEL • SITES • RAW MATERIALS • WEATHER • MARKETS • TRANSPORTA-TION • TAXES • VARIABLE PACTORS.

B&O's Industrial Development men know that you may put two or three of these factors way up at the top. They'll help you size up the situation with that in mind. Their outfit has industrial engineers, geologists, real estate men and others, with give you aplant leation report when will surprise you with its neople and profundity. No, you can't pay for it, and you're under no obligation!

The B&O has Industrial Development representatives at:

Constantly doing things - better!

His mother wondered why Johnny never realizing that

The doctor's checkup prompt treatment made Johnny

IT IS so difficult to know when a small child is really sick.

In Johnny's case his mother noticed that he was unusually quier. She thought he was still getting over his recent sore throat. But then she became aware of his lack of interest in his tops—even his favorites. He tired easily, was often cranky and sometimes complained of a stomach-ache and pains in his kness.

Symptoms like these occur in many different childhood diseases. Finally Johnny's mother became wortied and she took him to the family doctor for a check-up. After a thorough examination the doctor told her that Johnny had rheumatic fever . . . the disease that cripples more children than polio and all other diseases combined.

Though it may attack at any age, theumatic fever most often strikes between the fourth and fifteenth year. It may come quietly, with a variety of minor complaints, but often it leaves its victims with a heart impairment difficult to overcome.

Don't take chances

Never waste precious time when your child seems to be ill.
Don't try to guess what ails the child and don't take the advice
of a well-meaning neighbor. When you notice persistent
signs, take your child to the doctor—it will cost you less in
the long run.

Recent discoveries and developments in hormone drug therapy have given today's physician a completely new outlook

S A G

he was seriously ill

found the cause and

a healthy, happy boy again

on the treatment of rheumatic fever. For example, doctors have found that the use of these new hormone in treating children often results in amazing overall relief—may even prevent cripping damage to the heart, if used in time Today, many children who have rheumatic fever can hope for normal lives free of pain.

Do the sensible thing

If something seems to be wrong, make an appointment today to take your child to the ductor. Let him look the child vor make simple tests, if necessary—tell you what to do to keep your child healthy. He can put your mind at ease, guard your family's health—IF you let him.

Let the doctor decide

Today, all of medicine's amazing recent discoveries in diagnostic procedures, treatment and new drugs are at your doctor's command.

The Armour Laboratories is proud of its share in the development of many of these drugs. ACTHAR (A.C.T.H.-Armour), one of the most effective of these new hormone drugs, represents the results of many years of research by Armourszeintsus collaborating with leading investigators in the field of medicine. ACTHAR is available to you through your doctor. He may, or may not, find you need it. But you'll feel better, say better, if you let him decide. See your doctor regularly.

The Armour Laboratories

Sole producer of ACTHAR (A.C.T.H.-Armour), Since 1885, pioneer manufacturer of surfaces and pharmacouticals presented by the medical profession—notably THYROID, INSULIN, LIVER PREPARATIONS, and PITUITARY HORMONE PRODUCTS.

ART

HOGARTH'S "THE PAINTER AND HIS PUG"
Easy in oils.

Mere Cartoonist?

London was staging a show of Hogarths last week that would have pleased the old 18th. Century painter-engraver pink. Instead of featuring the satiric, story-telling picture series (Harlotz Progress, Rake's Proprest, Marriage à la Mode, etc.) which made him famous in his lifetime, the show was crammed with the portraits of prominent folk and the sprawling historical cannot be supported by the story of the

The cross William Hogarth had to bear was that he simply did not impress his contemporaries as a serious painter. His colors were too fresh, his draftsmanship too free & easy, his characterizations too blunt and unlattering. When held unclose of his oils in 1743 and 1751, the Deem heel oil originals of some of his most popular engravings sold for little more than the price of their frames. Finally, in disgust and despair, he took down the shingle of his trade from his London

house and retired to the country. He wrote in discouragement: "Time only can decide whether I was the best or the worst face painter of my day."

Last week's show supported a conclusion that time and later critics reached long ago; besides being one of the most biting social satirists and moralists who ever etched an engraving, Hogarth at his best could paint circles around most of his contemporaries. His portrait of Captain Thomas Coram, philanthropist-founder of London's Foundling Hospital, displays a British humor and humanity that Hogarth's two famous 18th Century successors, Gainsborough and Reynolds, too often sacrificed for a slick and fawning elegance. His March of the Guards Towards Scotland, an action-filled canvas of the departure of George II's soldiers to put down Bonnie Prince Charlie's Highlands uprising of 1745, is ironic Hogarth realism at its sharpest. Hogarth's most famous oil, The Shrimp Girl, is missing from the show, but a gently smiling Mrs. Salter and the portrait of Hogarth's niece, Mary Lewis, have much of the same spontaneous, light-brushed charm. In his selfportrait, The Painter and His Pug, Hogarth seems to have made a gentle joke at his own expense, played up the resemblance between man and dog.

It was the first big Hogarth exhibition in London in more than 100 years. Nobody in Britain seemed able to explain the long oversight for sure. Roland Becket, art historian and Hogarth expert, suspected it was the old trouble: "People think

700,000 Artists

ECA officials in Paris last week proudly displayed the winners in the biggest painting contest of the season. The competing artists: 700.000 European schoolchildren, aiming for \$5,000 of ECA prize money. Theme: "The free peoples work together for a better life."

LUTTENBERGER'S PRIZEWINNER
Happy in gouache,

The youngsters, responding in numbers beyond the fondest hopes of ECA, worked out the theme in oils, watercolor and gouache. Some of the subjects: builders reconstructing homes and churches, porters unloading ships and trains, farmers planting their fields with U.S. grain. In successive judgings, the original entries were cut to 1,500, then to 300.

Winner of the first prize (\$750) in the 12-to-16 age group was an Austrian boy named Franz Luttenberger, who did a happy gousde of his village. The other top prize went to a six-year-old French boy. Alain Cardot (4-to-11 class) for a spirited splash of workmen clambering over a half-louilh house. Alain was in seventh heaven. He lives in a cramped Parench serioned French Resistance veteran. his mother and a sister. Solid Alain: "Now, mana, I will buy you a bigger house."

ECA officials are planning to send the show on a tour of European capitals. Said one of them: "Frankly, we didn't expect anything this good."

GREEN PASTURES & STILL WATERS

All painting has eye appeal, and most of it can be lived with. The art of architects and of landscape architects is more fundamental: it is meant to be lived in. One of the top artists America has produced, Frederick Law Olmsted, worked entirely with hills and hollows, trees and grass. He designed fine parks for Boston, Detroit, San Francisco and Chicago, made Manhattan's Central Park his masterpiece.

Plans for Central Park were laid just a century ago. Olmsted spent most of the rest of his life making the dream come true. His aim was "to complement... the beauty of the town (with) the beauty of the fields, the meadow, the prairie, of the green pastures and still waters." It was not easy. The region chosen for the park was an unsightly swamp laced with bald rock ridges and primple with quanters' sharks. To see it whole and make it new required optimism and an unvarcating mind's eye.

Trained in the British tradition of landscape architecture, Olmsted designed Central Park for scenic richness and relaxation. He used its rocks as a kind of underpainting for his composition, and green verdure as a final glaze. He divided it with lakes and streams, wove it together with curving paths and driveways, pointed up its natural loveliness with small, well-placed buildings designed by Calvert Vaux, an English architect.

Olinsted foresaw that the "town" would soon surround his creation, installed four cross-park driveways. A touch of inspiration led him to sink the driveways below ground-level and thus preserve the park's visual harmony, Fighting off the people who wanted to embellish the park with opera houses, race tracks, accathedrals and fire stations was more difficult but almost an successful. Today, the one notable encroacher on the park's priceless rate leasts is the Metropolitan Museum of Art.

Central Park is used and enjoyed each year by some 30 million people—dowagers walking their dops, prizefighters doing their morning road work, oldsters drowsing in the sun, people of all ages making love in the shade, kids playing cowboys and Indians, nursemaids plying the baby-carriage trade. It is a huge, beautiful backyard for Manhatiar's harried hive-dwellers.

CENTRAL PARK (West Side view) is an Speacre plot of gentle countryside framed by Manhattan's jugged skyscrapers.

IN THE RAMBLE, between the East and West Drives, the rush and push of the city vanish like a mixed-up dream.

THE MALL, arrowing past statues of Robert Burns and Sir Walter Scott, points to Central Park's 19th Century "castle,"

THE LAKE (downtown view) is a rendezvous for sailors on leave, small-fry fishermen and fathers in need of exercise.

EDUCATION

Planned Babel

Monterey, a plessint, picturesque seafaring town 125 miles down the California coast from San Francisco, includes among its 16.000 papulation two notable linguistic groups: the sardine fabremen, and Air Force men, who speak in miles who speak Portuguese, and the U.S. Army and Air Force men, who speak in miles with protection of the property of the site of the protection of the protection of the site of the protection of the protection of the picture of the protection of the protection of the picture of the protection of the protection of the Militine deven months, most of them will be provided the protection of the Militine deven months, most of them will provide the protection of the protection of the protection of the provided protection of the prote

For ten years, the Army Language School has been preparing corporals, captains, and colonels alike for jobs as interpreters, attachés and occupation officials. The school began with only 60 students and one language (Japanese), but grew until it now has an enrollment of 933, a curriculum of 24 languages, and a fac a curriculum of 24 languages, and a fac-

ulty of 310.

Portuguese Eisenhower. Its methods are far removed from ordinary U.S. language teaching, "The one word I object Barnwell, the C.O., "is grammar. We don't burden the student with masses of rules and exceptions. Our big ambition is to make a man speak and understand.' The speaking begins right in the first class, "Are you a student?" a Danish instructor will demand, "Ja, jeg er elev" [Yes, I am a student l. the class must learn to answer. "Is he a student?" asks the instructor. "Ja, han er ogsaa." A class may consist of only one student, is never larger than eight. The men average 30 hours in class and 15 at outside study a week. At first, students are not bothered with

spelling; most of their homework is with phonograph records, and the textbooks they do use are spelled phonetically, Gradually, after weeks of listening to long lists of recorded words and phrases, students begin to read, starting with simple cartoon captions and working up to newspapers and regular books. Meanwhile in class and mess hall, they converse constantly, act out skits (e.g., parachuting into enemy territory), see movies with foreign languages dubbed in (among them: The True Glory, with General Dwight D. Eisenhower speaking a rippling, dubbed-in Portuguese), Finally. near the end of the course, students cut their way through a jungle of diplomatic, technical and military terms, until such formidable words as protivotankovoe ruchie (Russian for anti-tank rifle) come tripping off the tongue.

Originol Goethe. The school's faculty are all civilians, but not all trained teachers. One Czech instructor was a judge in Prague; a Russian was the son of a czarist general; a Rumanian D.P. was a stock

CLASSROOM SKIT AT ARMY LANGUAGE SCHOOL

boy in a Detroit department store. But in their own lands, many were noted scholars; they have come to the school via concentration camps, from jobs as elevator men and lemon pickers, and in some cases from U.S. university faculties. To make sure they keep in touch with student problems, all teachers must put in time on an unfamiliar language.

Under Colonel Barnwell, an Army regular (who speaks nothing but English), the school bears little resemblance to the usual Army post. "It is a college," says the colonel, "not a guardhouse." There is little saluting or parading, and no required study hours. But in ten years, the school has turned out 2.095 able linguists, now scattered all over the world, speaking the

MAGNATE WALTER
Lesson in Reno: man shoots wife.

local language without the hindrance of interpreters, and able to read Pushkin, Balzac, Goethe or Sun Tzu in the original. Says Colonel Barnwell: "If the U.S. had only had a school like this 40 years ago, who knows how many messes we could have avoided?"

Scholarships for Adventure

In Paris one night last week, President Vincent Aurolo of France sat down to a banquet of bosel bouquetière in honor of a special group of guests; 4: French school-boys, who had some tales to tell. A few months before, each boyh add set out on a solitary Journey of thousands of miles with about 8g, for the whole trip. For with about 8g, for the whole trip. For ships, dinner with M. Auriol was just one in a long series of adventures.

Road to Riches. The idea for the scholarships was born more than 42 years ago, in the mind of Jean Walter, a struggling young architect with a passion for travel. Each summer Walter would set out alone on a trip with enough money to get him far away from home, never enough to get him back. When his cath ran out, Walter him back when his cath ran out, Walter dastry and wits. He traveled in nine countries, worked as a farmhand, dishwasher, errand boy. One day in French Morocco, Walter

One day in French Morocco, Walter saw something that changed his whole life: traces of lead ore, which he recognized because he had seen the same ore around a big mine near Joplin, Mo, U.S.A. Against the advice of experts, Walter decided to start the Zellidja mine at the site. Within a few years he was getting rich,

He became a multimillionaire, with interests in big plantations in Morocco, a fine mansion in Paris. But Magnate Walter never forgot how he hit his first jackpot. In 1938, he decided to set up his special scholarships so that other boys might learn to get around and keep their eyes

Try the worlds smartest, coolest drink - Gin and Tonic, made with Quinac CANADA DRY WHER

open. Since then, he has sent 950 boys on journeys of adventure—always with just enough money to get far away from home.

Riding the Rods. Last week, this year's crop of winners had plenty to report. They had covered nine different countries, had slept in haylofts, ridden the rods, done everything but beg, borrow or steal to get along. One boy had thumbed his way to Sweden to study cellulose factories, had carned his bread by singing in the igns along the way.

Some boys got as far as the U.S. One worked his way across the Allantic as a paint boy on a ship, traveled from New Orleans to Chicao, returned with a manuscript for a full-length book. Another boy cycled from Ottario to California, making his way by giving radio interviews. He was attacked by a bull, sidework was the same attacked to bull, sidewish, and the same and the worker has bull to the worker of t

Says Jean Walter, now 68: "In my own travels, I was able to contrast the different types of architecture, and that brought me success in my building projects. I was able to study different methods of farming, and that helped me improve my colonial plantations. I was able to study mining methods, and that brought me success in Zellidja. The boys will do likewise."

The Wall Can Be Too High

Ever since the U.S. Supreme Court's decision in Illinois' famed McCollum case (TDME, Sept. 2a, 1945), states and clites with "released-time" programs have been faced with a worrisome question: Can religious instruction for public-school children ever be legal? Last week the New York state court of appeals gave an answer: yes.

The decision grew out of a suit brought by two Brooklyn parents who charged that New York City's released-time program (in operation since 1941) was a clear violation of the principle of separation of church & state. In a 6-to-1 decision, New York's highest court declared that it was not. The program in New York, said the court, was nothing like that of Champaign, Ill., which the Supreme Court had declared unconstitutional in the McCollum case. In Champaign, religious instruction took place on school property, thus got some support from public funds. In New York City, this is not so; the children are merely dismissed an hour early, one day a week, if the parents want them to have religious teaching elsewhere. "It is manifest," said the court, "that

the McCollum case is not a holding that all released-time programs are per se unconstitutional.. The Constitution does not demand that every friendly gesture between church and satie shall be dissured to the constitution of the constitution o

Police Radio-

A High Speed Weapon Against the Public Enemy

and one more example of Mallory Creative Engineering

ONE OF THE LAW's most effective weapons in the grim, real-life game of "Cops and Robbers" is the police two-way radio. The story of its development offers a striking illustration of how Mallory creative engineering has contributed to the practical dependability of a wide variety of modern equipment.

Twenty years ago, Mallory pioneered the compact vibrator which converted power from the automobile storage battery into usable form for radio operation—making automobile radio a practical reality.

Now a Mallory rectifier stack combines with a heavy duty, high output alternator to add to the dependability of two-way radio telephones in police cars, taxicabs, buses, trucks, small boats and military vehicles. Even when the vehicle is operating at idling speed, this alternator-rectifier system generates adequate current to keep the battery charged and provide reliable radio communication at all times.

It is this same Mallory rectifier stack which has demonstrated such rugged durability in battery chargers, electroplating equipment, laboratory testing instruments and many other applications where elevated temperatures would otherwise present a serious problem.

Mallory is prepared to apply its products, facilities and widely diversified techniques to the needs of an accelerated industrial mobilization.

Security of the second of the

Manufacturers of any product involving electronics, electrochemistry, electromechanics or metallurgy are invited to make use of Mallory creative engineering in improving designs, stepping up production or lowering costs, through the use of standard Mallory components or socially designed adaptations.

RADIO & TELEVISION

Secret Longings

"Dear Art Baker." said a letter addressed to the M.C. of television's You Asked for It. "I would like to have my son Gary shoot a television set on your show, Perhaps you think this is a strange request."

Inured to stranger ones, Art Baker and his staff of 8 scarcely gave it a second thought. In their six months of operating You Asked for It (broadcast from Los Angeles' KTTV, fed to the nation a week later by Du Mont from New Yo.k), they have already shown, in response to requests: a one-armed paper hanger in action, a man fighting a bear, another wrestling an alligator, a boxer fighting a wrestler, a 600-lb. cowboy mounted on a luckless pag, a close-up of a lady swallowing swords, a swallower of goldfish, a Hopi Indian rain dance complete with rattlesnake, a scientist who showed (with the help of liquid air at 300° F, below zero) what the world might be like if the sun went out. For last week's show, one "Can-nonball" Martin came out of retirement to be pounded before the cameras with sledge hammers,

You Asked for It went on the air last January in Los Angeles, broadcasting pleasant sights such as \$1,000,000 in cash (Sto bills arranged in as stacks, each stack worth \$2,000.) But it soon began to expecialize in the dark, sever bondings of dark and secret to grant; several requests to see a man electrocuted; a re-enactment of Joan of Arc burning at the stake, requested by a Minneapolis classroom; a 60

m.p.h. head-on crash of two cars.

cided not to let little Gary shoot up a TV set on the program. But there are plenty of other alarming requests to pick from. Some 2,000 come in every week, 45% of them from the not-so-innocent young. Last week Båker decided to gratify one of his most grisly requests to date, was going ahead with plans to film a face-lifting operation on a woman.

"We've got to be careful," says he, "not to let the show degenerate into a simple variety show." The tastes of the 1951 public being what they are, there seems to be little risk of that.

Program Preview

For the week beginning Friday, July 20. Times are E.D. f., subject to change.

Adventures in Science (Sat. 3:15 p.m., CBS). "Psychology at Work: How to avoid major blunders in picking a wife, a secretary or the person to fit any job." Your Invitation to Music (Sun. 1 p.m.,

CBS). Classical records with Composer Norman Dello Joio as guest. Hollywood Star Playhouse (Thurs. 8:30 p.m., ABC). Barbara Stanwyck in I'm A Coward.

For economy...
Delays can be disastrow in the handling processing or manufacturing of many history. Dependable C-H Control quickly pays for littell wherever failure or faulty performance

Electric motors have played a great part in making America strong and abundant. They have lifted the burden of brute labor from the backs of men. They have made machines possible that do almost anything better, faater and at a lower cost. This name that the strong manufacturing plants today employ more than 10,000,000 electric motors. So it is easy to understand when the strong protects these millions of motors, both merits and receives just about the most careful selection of all industrial purchases.

Many users of electric motors have

Cutler-Hammer general purpose motor control is recommended by a majority of all electric motor manufacturers, is featured as standard equipment by machinery builders, is carried in stock by recognized electrical wholesalers everywhere.

discovered definite advantages in standardizing on one make of motor control . . . Cutler-Hammer Motor Control. Specifying Cutler-Hammer insures uniform dependability for all motor drives. It avoids confusing variations in control units. It permits interchangeability. It simplifies maintenance. It minimizes both investment and storage space needed for adequate reserve stocks of units and parts. To be sure, you too should insist on Cutler-Hammer, CUTLER-HAMMER. Inc., 1308 St. Paul Ave., Milwaukee 1. Wisconsin. Associate: Canadian Cutler-Hammer, Ltd., Toronto.

THUS IS EASY

Whether you're a shopper or a shipper, it's easy for you to get a lot of things from where they're been to where they're going. For this, you can thank the packaging industry.

Here's an industry that's always progressing —developing better containers and packages to move more products more safely, more speedily, more economically. Important contributions to these all-round improvements are supplied by chemicals and plastics—many of them furnished by Monsanto. They are applied to paper, wood, metal, glass, foil, tane, seals, labels.

Water resistance, for example, is added by a Monsanto chemical to tubular-type containers, paper cups, Kraft bags, wrapping, paper. Monsanto paper-coating lacquers improve moisture resistance, add hear-sealing features to glassine papers. Still other Monsanto chemicals, applied to wraps, inhibit rust and corrosion to metal parts.

Plastics, of course, are pre-eminent in packaging. Here, too, Monsanto is a dominant factor—supplying plastics that appear in a thousand colors, for a thousand uses—for rigid and flexible packages—for luxury and utility service. Many of these plastic packages have display and re-use value.

In the field of plastic film wrappers, Monsanto also occupies an important role supplying plasticizers for food containers and enclosures where nontoxicity is a requirement, for adhesives, vinyl films, cellulosic strip coatrings.

Thus, and in many other ways, Monsanto serves the packaging industry which, in turn, makes it easy for you to ship and shop more safely, speedily, economically... Monsanto Chemical Company, 1700 South Second Street, St. Louis 4, Missouri. In Canada: Monsanto (Canada) Limited, Montreal and Vancouver.

To the Packaging Industry

Illustrated and described here are only a few of the many applications of Monsanto chemicals and plastics to packages, containers, wraps, closures. Their production and availability are geared to meet current demands of the national economy.

Mersike Monsanto's synthetic sizeis used as a beater additive in papermak ing to increase resistance to water an moisture penetration beyond that obtain able with ordinary rosin size alone Mersize actually reduces manufacturin costs while making these improvements finds with application in figuid containers milk-hortic caps and similar packagin and closure uses.

Santickers Montanto plasticizers hand numerous uses as components of many cypes of film wrappers. Santicizer "141, B=16 and E-15 are particularly adapted to montoxic parknering uses in the food leid—are widely used in wraps for meats, used to be a superson of the components of the lard. Fechnical services available to package manufacturers.

Deal Rejected

Marshal Tito, busy mending fences, made a direct offer to the Vatican last month to release imprisoned Archbishop Stepinac. Tito's condition: that Stepinae leave Yugoslavia the moment he is released. Last week the Vatican reported Tito's offer—and its own reply; no bargin. "The Holy See would be pleased if Monsignor Stepinae were freed," said the mawer to Tito. "The Holy See is informed, mawer to Tito." The Holy See is informed, to remain near his faithful." That seemed to hand Tito's awkward dilemma right back to Tito.

Chief Justice on Morality

Is there an absolute distinction between right & wrong? Or are moral laws really a matter of changing times, changing cus-

Last week Americans were invited to take a sharp second look at an answer made by the nation's No. 1; judge. Wrote Chief Justice Vinson, in his majority opinion upholding the conviction of the eleven top U.S. Communists (Thue, June 11): "Nothing is more certain in modern society than the principle that there are no absolutes."

Commented the Christian Century:
"Visions' statement I plays into the hands of those who deny the existence of the moral law and, in public affairs, make the interests of the state the supreme morality ... So long as it remains the basis on which judicial interpretation operates, it is a threat to the moral future of the nation."

The Century's editors cheered an equally sturdy dissent by Felix Morley (in Barron's Weekly): "Our whole system of In these hands evidence of a "good place to work" ScotTissue Towels are evidence of progressive,

ScotTissue Towels are evidence of progressive, considerate management. Softer, more absorbent, they have a definite quality "feel" about them. They stay tough when wet, too, which means one towel dries both hands:

Washrooms rank as one of the four most important factors in good working conditions—according to a survey of workers from 400 plants. Specify ScotTissue Towels and you'll be doing your organization a real favor.

For suggestions on how to plan the right kind of washrooms, call on the Scott Washroom Advisory Service, Chester, Pennsylvania.

Quaker Morley gave him the beneit of the doubt: prevunnally Vinson wrote "at the foot of a difficult and trying assisting the control of the Chief Chief

Whatever the explanation, Kentuckian Vinson's aside on morals drew no dissent from his brethren on the supreme bench. And no wonder. The doctrine he pronounced stems straight from the late Oil-ter Wendell Holmes, philosophical father of the present Supreme Court. In one way or another, it has been voiced by the court many times, notably by Justice Felix Frankfurter, nonjunite (1914-29) Havand fire Holmes and the Supreme Court (1920), discovers under the New Deal, of scores of bright young men (the Happy Hot Dags) for top Government positions,

The Anglican Genius

The Church of England is the world's most notable balance of two separate traditions: Catholic and Protestant. Now & again, the balance is strained. Latest symptom: high-church Anglo-Catholics, who object to being called Protestants, have been bucking hard at all suggestions of closer cooperation with Britain's Protestant "Free Churches" (Methodists, Constant "Free Churches" (Methodists, Constant "Free Churches" (Methodists, Constant "Free Churches") (Methodists, Constant "Free Chu

This month London's Church Times, unofficial voice of the Anglican hierarchy, spoke out in admonition to Anglo-Catholics and Evangelicals alike, reasserted the

hurch's traditional balance.
"The terms Catholic and Evangelical,"

said Church Times, "rightly stand for different traditions of emphasis. But of emphasis only. The great Catholic tradition ... emphasizes the importance of due order and authority, the vital place of the sacraments ... The Evangelical tradition stands primarily for emphasis upon the saving power of the Gospel ..."

The two traditions must help each other or be lost. Catholics need "a passionate Evangelical zeal for teaching and preaching the truth. They must not needect that sword of the spirit which is the Word of recognise the need for due order and authority within the Church. They must not excapture the reality of the supernatural in the sacraments. . . With the common cenny at the gate, how criminal that the garrison should be divided by labels which of the one sword reverse of the order of the one sword reverse of the one of the one sword reverse of the one of the one sword truth. . . . and reverse of the one of the one sword truth. . . . and reverse of the one sword return the contract of the one sword truth. . . . and reverse of the one sword return the contract of the co

"After all, the genius of the Church, and perhaps of the English nation, is that it has held these two strains of tradition together. They are held in tension, but the tension need not be an unhealthy one. The mischievous thing is to suppose that the two traditions are in opposition. The simple truth is that any true Catholic must be evangelical. Any true Evangelical must be Catholic."

How Honeywell Controls help the new luxury liner"Constitution"carry its own climate

In this summer of 1951, modern American living went to sea — on the maiden voyage of the American Export Lines' fabulous new liner, "Constitution."

On this air-conditioned ship, you dial your own climate—in your own room as you can do in so many modern homes. All the controls—not only the personal thermostats in each smartly decorated stateroom, but hundreds of other automatic controls throughout the "Constitution" and its sister ship, the "Indepentation" and its sister ship, the "Independence"-are Honeywell Controls.

Thus, Honeywell helps America live better afloat, just as it does ashore in millions of homes, schools, hospitals and commercial buildings. Just as it helps America torch better, too, for Honeywell Controls do hundreds of different jobs in hundreds of different industries.

This is the Age of Automatic Control everywhere you turn.

And Honeywell has been the leader in controls for more than 60 years.

America lives better-works better-with Honeywell Controls

Honeywell

For information about automatic controls for ships, planes, buses, and trains; for heating, ventilating and air conditioning; for industrial processing-write Honeywell, Minneapolis 8, Minneavota. In Canada: Toronto 17, Ontario.

First in Controls

Glue that cushions the bumps

Easy as this! When shipping, You can't stack loose shipping containers in a freight car or truck. They'll bounce around. And damage critical defense material. You use glue! Two casily applied strips. Along the bottom, These strips lock each container to the one immediately below. As many as 32 on a single wooden pallet. They can't bounce around. Contents aren't damaged. Handling's faster. 32 containers are picked up as one. Unloading? An upward thrust releases each container, Easily! ... and there's more to load-locking with glue!

· "you name it . . . I helped make it!" Multi-wall paper and fabric bags can also be palletized with glue. Here, too, pilferage is discouraged. Damage claims reduced. Steel straps eliminated. Handling costs are lowered. One man can load or unload an entire freight car in one hour. The NATIONAL touch is everywhere. Glue applied through imaginative research and service.

To every item of defense and daily life,

Labor Trouble

The Vatican's 450-year-old corps of wear red-yellow-and-blue uniforms designed by Michelangelo. But they suffer from the cost of living just as much as floorwalkers or bus drivers, Last week, in an open letter sent to Rome newspapers, guardsmen asked the Holy See for a pay

Oldtimers in the ceremonial guard (currently six officers, 113 men) were in open resentment of the fact that the rival Papal Gendarmes get higher wages, Sixteen new recruits (who must be Roman Catholic Swiss, 19 to 25 when they enter the corps, may not marry until they leave it or become officers) wasted no time arguing. They packed up for Switzerland.

The Vatican thought it had a pretty good case: besides their monthly salary of

VATICAN SWISS GUARDS

41,000 lire (\$50), the guards get free quarters, uniforms, food, cigarettes and beer. That makes them better off financially than the average Italian civil servant. Also, unlike the Papal Gendarmes, who maintain order inside Vatican City, they have no police duties.* To avoid discontent, however, the Vatican released the 16 complaining recruits from the terms of their enlistment contracts. It is also giving thought to increasing the allowances of the guards who remain.

though once the Swiss Guard was the elite of the papal armies, Their greatest historic moment came in 1527, when they were almost annihilated on the steps of Saint Peter's by the army of Charles, Duke of Bourbon—but their delaying action probably saved the life of Pope Clement VII. Recent Popes have not needed such protecBest of breed ... best in show

This Overhead Saves You Money

The material these workmen are installing illustrates a principle you should know, whatever your business may be.

The principle is accomplishing several jobs for the price of one. Here Fiberglas* Insulating Form Board serves four purposes, It provides a form for pouring the gypsum roof... serves as a highly efficient roof insulation... provides an excellent acoustical treatment... and adds to fire safety.

Doing several jobs at once—saving money and materials—is a habit of Fiberglas products that is getting them used in more ways every year. You find them now in everything from construction materials to sheer marquisette curtains,

Their ability to do these multiple jobs so well comes basically from the fact that they are made from fibers of glass and glass won't burn, rot, swell, shrink or age.

Fiberglas materials offer unique combinations of properties that should stimulate your imagination. Study the column at the right. Then ask us about the combination that will make money for you. Owens-Corning Fiberglas Corporation, 1407 Nicholas Building, Toledo I, Ohio.

Write your own ticket

With Fiberglas materials, either alone or in combination with other materials, you can have almost any combination of the following properties that your imagination can see a profit in:

STATE OF BUSINESS

Breather

U.S. civilian production will be cut back no more this year, said NPA Boss Manly Fleischmann last week. But the good news was received without cheers; sales were already so slow that many businessme were cutting back of their own accord.

One of the hardest hit was the textile industry, whose sales have been "slow to lousv" for four months. Textron, Inc., whose rayon weaving mill in Suncook, N.H. closed down for vacations at the end of June, decided to postpone reopening of the plant indefinitely; its nylon weaving plants closed down for two vacation weeks instead of the normal one.

COMMUNICATIONS

The General (See Cover)

The public scored David Sarmoff's Radio Corp. of America with a lost round last year in the great color TV fight with Columbia Broadcasting System. Sarmoff did not stay down. Last week he showed the television industry a new tube that the public that RCA's and he showed he public that RCA's and the showed he was the stay of the stay of the what CBS's can not: color programs broadcast by RCA can be received in black & white on present sets without any change. It looked as if radio's miracle man had not run out of miracles.

For months, Wall Street speculators

SARNOFF AT NANTUCKET After a disaster, orders from President Taft.

Other textile manufacturers followed suit. planned cutbacks of 10% to 50%. There were also spreading cuts in wholesale prices, not only in textiles but in soap (Procter & Gamble and Lever Bros. cut 11%) and in shoes.

Merchants, still plagued by heavy inventories, were also cutting retail prices to move goods faster. The move paid off: sales rose a bit higher than the same time last year, when war-scare buying was at a peak. Retail food prices were still edging up. This week, the Bureau of Labor Statistics reported that retail food prices went up I of 1% in the last half of June, pushing the food-price index 12% above the pre-Korean level. But there were surplusesand probably lower prices-ahead. Farm planting, said the Agriculture Department. is at the highest level since 1933. In the stockyards, even the price of beef eased off a bit, as a heavy flow of cattle came to market. But most businessmen still thought the lull was just a temporary breather.

have been betting on Sarnoff, So far this year, RCA stock has risen from 16] to 21½, CBS fallen from 33 to 25½. This trend is the more remarkable because six months ago RCA was apparently caught flat-good far the state of the

decided not to wait.

Even then, old radiomen kept their eyes on Sarnoff. He is the man who put radio in the home—and never forgets it for a waking moment. He is boss of RCA with its \$2,000 employees (including those of the 23,84-station NBC radio and television network), of 13 manufacturing plants which turn out millions of radios, TV sets and hundreds of different electronic gada-

ets, of a research staff which year in & year out develops new wonders. Would Sarnoff, who boasts that he was born about the same time that the electron was about the same time that the electron was twins), allow himself to be bested in the next great advance of the industry that he had led for two decades? Those who knew sarnoffs wat ability—and his vast pride —thought not. They listened when, coldly have lost the blattle but well win the war."

Secret Weapon. To get the weapon he needed, Sarnoff prodded RCA, not a nimble organization, into an amazing burst of speed to improve its color system. Last week, in his Radio City Exhibition Hall, Sarnoff put on a demonstration for some 200 radio and television reporters, who saw a 20-minute program starring Nanette Fabray and Singer Yma Sumac on RCA's new color tubes.* There was no blurring or running of colors, even in the fastest movement, e.g., a pair of performing lovebirds flapping their wings. As a show topper, an RCA mobile unit focused on a swimming pool near New York where a troupe of swimmers and divers performed. The outdoor telecast, which RCA explained could just as well be a football game or boxing match, came through almost as clearly as the studio show.

Within two months, RCA will start putting on similar public color demonstrations on 100 receivers which will be moved from city to city all over the U.S. By broadcasting its color show last week on its regular channel, RCA also showed TV set owners that its system is compatible, i.e., it could receive the broadcasts in black & white. (RCA can also convert existing sets to color.) The new tube's performance was so impressive that such TV competitors as Allen B. Du Mont, who has opposed any form of color up till now, changed their minds. Said Du Mont: "The RCA picture was good enough to start commercial programs immediately.

Sarnoff is far more cautious. He says: "Commercial color television on a big basis is still two to five years away. Material shortage, NPA cuthacks on TV production and defense orders will delay it. On top of that, it will take a long time to get the bugs out of mass production of the color tube."

Many a TV man thinks that Sarnoff's five years is too long, One big reason is that when FCC made its decision last fall, TV setmakers were almost solidly against the CBS system, because they were up to their ears in orders and wanted to make no changes that might upset sales. Now,

9 In RCA's system, the color-television camera, breaks a picture down into three color fred, green and blue). These color impulses are broad-cast, picked up by a television receiver circuit, which sets off three electronic "suns" (one for picture the picture than the picture than the picture than the picture than the picture pict

TV manufacturers are up to their ears in unsold sets, are more likely to grab at RCA's system, which they think will get customers buying again. RCA has already given manufacturers the blueprints of its color system, to make sets (on a royalty basis)—if FCC gives the go-ahead.

Whatever technical or bureaucratic difficulties may lie ahead of RCA's color system, it was clear from last week's demonstration that Sarnoff was fighting his way out of a tough spot.

For more than 50 of his 60 years, Sarnoff has been doing just that. Driving through obstacles is his habit, his joy, his bitter necessity, He says: "There are three drives that rule most men money, see and power." Nobody doubts that Sarnoff's ruling drive is power. Says a deputy: "There is no question about it, he is the god over here."

The Hermitage, American business biography abounds in up-from-the-bottom stories; few are quite so dramatic and revealing as Sarmoff. American district and that Sarmoff had lived "the most amazing romance of its kind on record." Horatio Alger himself could hardly have done it in one book, he would have needed Adrift in November 10 of the November 10 of

HERCULES POWDER COMPANY 933 Market St., Wilmington, Del. months. When his big chance came, he was ready for it: be was an operator in the Marconi wireless station, atop John Wanmanker's Manhattan store, on the night of April 14, 1912, when he picked up a message from the SS. Tilonie: "Ran into iceberg, Sinking fast," For three days & mights, the nation waterd breathesily white Samoff, going without sleep, provided its control of the property of the provided its off the air to enable Operator Samoff to catch the messages.

Samoff notes that the Titunic disaster "brought radio (and incidentally me) to the front." As a result of the disaster. Congress passed a law requiring every ship with more than 50 passengers to carry wireless. American Marconi set up a school to fill the sudden demand for operators; Samoff became an instructor at the school, rapidly moved up the ladder to commercial manufacture.

The Music Box. In 1915 he wrote a historic mean to his box. Experiments had already proved that wireless could broadcast speech as well as signals,* but since anybody could "disten in" on such messages, the wireless companies thought messages the wireless companies thought of any commercial value. Samoff realized its possibilities. In his memo, he proposed to build a "Radio Music Box . . to bring music into the house by wireless . . Receiving lectures at home can be made perfectly audible; also events of national importance can be simultaneously an world Wart. Examoff's memo was imored.

world walf, Sartion silend was guided, end the British wireless monopoly. All Government urging, General Electric's Vice President Own D. Young soft C.S., Westinghouse, United Fruit and A.T. & T. to Government and C.S., and C.S. and C.S.

Sarnoff dug out his old 1915 memo and tried it on Young, who liked the "music box" idea. But RCA's directors were willing to risk only \$2,000. Sarnoff gave a demonstration that woke them up. He borrowed a Navy transmitter and helped give a blow-by-blow broadcast of the 1921 Dempsey-Carpentier world championship fight. It created a sensation; about 200,ooo amateur wireless operators and others with homemade sets heard it, and spread the news of the wonder so widely that the public clamored for sets, RCA quickly developed the "music box," and both G.E. and Westinghouse began making it. with RCA acting as wholesaler,

Everyone thought that Sarnoff was foolishly optimistic when he predicted that \$75 million in boxes would be sold within three years. Actual sales: \$83 million. David Sarnoff, a prophet with honor, was

FRANK FOLSOM
A weakness eliminated.

soon radio's wonder boy, teeming with ideas. Why not, he proposed, put radios and phonographs in a single cabinet, save space, cut costs by using the same loud-speakers? Sales of such combinations soared. Why not start a radio network to improve programs, broaden the market for sets? At Sarnoff's urging, RCA founded NBC and the Red network. Two months

later, the Blue network was added.
Chonging the Tune. The radio field
was being invaded by so many newcomers
that Sarnoff got worried; he thought RCA
should expand into other fields. But RCA's
profits were needed to keep pace with the
mushrooming radio business; there was
little left for the kind of expansion he had
in mind. So Sarnoff began his famous

VLADIMIR ZWORYKIN
An eye invented.

HERCULES

* Reginald Fessenden had made such a broadcast in 1906, when wireless operators at sea were startled to pick up the unearthly sounds. series of expansions without cash; he traded RCA products and stock for the com panies he wanted. RCA had developed the Photophone, a device for talking movies, and traded rights to it to Radio-Albee-Orpheum and F.P.O. Productions. Inc. for 65% of their stock. The name was changed to the Radio-Keith-Orpheum (RKO). To get into the manufacturing business on its own, instead of remaining only a wholesaler of sets, RCA swung an even bigger deal: RCA took over Victor Talking Machine for \$150 million worth of RCA preferred and common stock, a price that Wall Street thought far too high. RCA profits continued to soar. In 1929, the company that had hesitated to spend \$2,000 on Sarnoff's music box grossed \$176,500,000 as a result of it, netted \$15.8 million, and was one of the sensations of the big bull market,

Radio stock went soaring from \$2.50 to \$549 a share, was split and resplit. Insiders made killings in radio pools, but Sarnoff had a reputation for keeping aloof from such shenanigans. At their height, he sailed to Europe to help Owen Young set up the Young Plan for German reparations.

When Sarnoff came back in 1930, he was elected president of RCA and faced the Depression. It was forcing many a radiomaker to the wall, but Sarnoff kept on driving ahead, In 1932, the Department of Justice forced G.E. and Westinghouse to give up their 51.3% control of RCA (by distributing their RCA holdings to their own stockholders). In this way, RCA achieved independence, but as part of the deal Sarnoff also had to pay off \$17.9 million that RCA owed its parents. He did it partly when he turned over to them RCA's tan (which G.E. still uses for its executive office), partly when G.E. and Westinghouse wiped out \$8,900,000 of the debt, RCA had outgrown the building, anyway. For new quarters, RCA took over the biggest building in Rockefeller Center and handed out 100.000 shares of preferred stock as

By then, the Depression had hit hard enough so that Samoff decided to lighten ship, He started selling off control of RKO and later, on orders of PCC, sold the Blue network (it became the American Broadcasting Co.). In RCA's stock-swapping years, it paid no dividends. The first one was not paid until 1937, nearly 20 years after the company started. Sarmelf himself if it more than the property of the company started in the company started. Sarmelf himself in the company started. Sarmelf himself it is nearly than the company started of the company started that the company started is not the learner of the company started. Sarmelf have been seen that the started is not the company started that the company started is not the company start

the control of the co

Like a Clydesdale horse, Cast Iron Pipe is known for STRENGTH

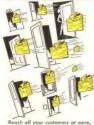

Like a draft horse, pipe to be laid under paved streets should be known for strength. Modern traffic and utility service conditions, both above and below ground, subject water and gas mains to stresses that demand four strength factors—shock strength, crushing strength, beam strength and bursting strength. No pipe that is deficient in any of those strength factors should ever be laid under paved streets of cities, towns or villages.

Cast iron water and gas mains, laid over a century ago, are serving in the streets of more than 30 cities in North America. Such service records prove that east iron pipe has all the strength factors of long life and economy. Cast Iron Pipe Research Association, Thos. F. Wolfe, Managing Director, 122 So. Michigan Avenue, Chicago 3.

Lovebirds flapped unblurred wings.

Fair on April 30, 1939, Sarnoff made the first U.S. commercial telecast with the words: "Nowat last weadd sight to sound." But even so it was not until after World War II that the mass production of TV sets began.

Out of RCA's big research headquarters at Princeton, N.J. Dr. Zworykin (who joined RCA in 1920) and his colleagues, under Vice President C. B. Jollife, brought many other startling developments: the electron microscope, the infrared "snipersope" which enabled World War II G.Ls to knock off skulking Japanese troops at night, "shoran" for accurate

blind-bombing. In World War II, RCA turned out an estimated \$500 million worth of devices for the armed forces. Now it has big defense orders, many for products no one else can make. Sarnoff is no scientist, yet of all RCA's activities, research is nearest his heart

and he is one of the few top men of the industry who can talk to scientists without an interpreter. And research represents tomorrow, expansion, new success which David Sarnoff, after the painful insecurity of his early life, still seeks,

Collector's Items. Modesty, false or

coherors from: Modesty, Talse or otherwise, does not disguise Sarmoff's power and success. His chill blue eyes shine with impatient energy, his boyish, scrubhedpink face radiates cockiness, All 5 feet 5 inches of his bull-necked, bull-chested figure bristles with authority and assurance. He dresses with conservative, expensive elegance, even carries a gold frame to hold matchbooks.

At RCA he makes all the top decisions, is brusque with slower-witted underlings. He insists that every memo to him must be no more than a page, but allows himself more latitude, has written memos as long as 30 pages. A collection of his better memos, bound in gold-tooled leather, is a prized Sarnoff possession.

To record his accomplishments more

fully, Samoil keeps a man working on the history of RCA and his life & times (unpublished, its now in its twelfit volume). Buildished, its now in its twelfit volume. It was a support of the property of th

Again & again, he makes two points about his own personality: 1) he loves music, 2) he does not love money.

In the teeth of the realities, of commercial radio and TV, he tries sincerely to hang on to his dream of the "music box." Sarroll gets number of the credit for the fact Sarroll gets number of the credit for the fact from musical Illiteracy to a nation, where millions, know and love good music. Sarroll's original idea was that makers of radio sets would sponsor cultural programs. To this day, he has little knowledge radio getter shall be realized to the real for the radio sets would sponsor cultural programs. To this day, he has little knowledge radio extertainment, and he despises cheap radio extertainment.

Sharps & Flats, Sarnoff's closest friends such friends as NBC Music Director Sam Chotzinoff, Jascha Heifetz, Vladimir Horowitz, etc., stage elaborate costume parties at Sarnoff's home. At a surprise party for Toscanini, the Maestro was shown to the sixth floor when he arrived. asked if he had a reservation, was finally led into what seemed to be a nightclub. A blare of jazz assailed the conductor's ears, Sarnoff acted as ringmaster in a circus act while Elza Heifetz Behrman, sister of Jascha Heifetz and wife of Playwright S. N. Behrman, rode a make-believe horse, Toscanini sat with his head in his hands all evening, would not look at the show. and was not amused.

Last year, for Sarnoff's birthday, the

group staged a satire. Chotzinoff, impersonating Sarnoff, sat at a breakfast table, surrounded by telephones, talked into all of them at once, pounded the table, chewed up cigars. Sarnoff was amused.

Samoff likes to tell people that he is not a man of big wealth. Considering that he has been for 20 years at or near the top of an expanding industry, this is a sensational statement—and people who ought to know believe it. He has 5,000 shares of RCA stock and \$200,000-ayear salary.

His home life is as elegantly comfortable as that of any non-millionaire in the world. The Samofi home in Manhattan has six floors, 30 rooms, two patios, a barbershop and a projection room. In almost every room, including the servants', are radio and TV sets, with tuning gadgets concealed among the furnishings.

This menage is presided over by his French-born wife, Lizette, whom he met and married 34 years ago in The Bronx. Sarnoff explains the courtship: "I could speak no French. She could speak no English, So what else could we do?"

Mojor Weakness. Sarnoll's lack of interest in some of the commercial aspects of radio may account for the fact that RCA's brilliant record in research and RCA's brilliant record in research and done much to eliminate this weakness is Frank M. Folsom, onetime vice president of Chicaro's Goldbatt Bres. and Montgomery Ward, and chief of the procurpant of the procurley of the procurley of the procurtive of the proc

As RCA chairman, Sarnoff lets President Folsom handle most executive details. Folsom is thus the empire's only heir apparent, but at 57, he is close to Sarnoff's own age. There are a few able younger me coming up, but RCA's anjor weakness is lack of a solid second chelen of younger excutives. It is not offer the contoning the control of the contr

Slow but Sure. CBS got the jump on RCA, not only in color, but in putting on the market three years ago the slow-playing record that revolutionized the phonograph business. Not long after that, CBS raided NBC's radio shows, snatched away such top stars as Jack Benny, Amos & Andy. At the time NBC lost the stars, it looked as if it would be hard hit. But Sarnoff has a way of coming out ahead, despite defeats. After the rumpus over the long-playing records died down, business for all record companies, including RCA, picked up. Thanks to the astounding spread of television, the network has hardly missed its radio stars.

To Sarnoff, these were all skirmishes, nothing to scare him from his plans to expand RCA into new territory. He is already tiching to put RCA into the electric-appliance business, NBC into the movie business (to make films for television), and is planning a "pay-as-you-hear" TV system which would not depend on the part of the property of the proper

BOEING caliber?

Bocing's world-wide reputation for sound engineering achievement is founded on men. Boeing engineers and physicists are graduates of many universities and technical schools. Under inspiring lead-criship they have been welded into one of the most potent forces in any field of scientific advance.

If you can measure up to Bocing standards, there is an attractive future for you in this renowned group. In addition to the prestige which attaches to being a member of the Bocing engineering team, there are other definite advantages:

- The challenge of working on such vital programs as the B-47 and B-52 jet bombers, guided missiles and other revolutionary developments.
- Stability of career opportunity with an engineering division that is still growing stendily after 35 years.
 The invigorating atmosphere of the Pacific.
- 3 The invigorating atmosphere of the Pacific Northwest-hunting, fishing, salling, skling-temperate climate all year around.
 4 The availability of housing. Newcomers to
- Sentitle are able to get accommodations—and that's unique in a great aircraft manufacturing center.
- 5 Good salaries. And they grow with you.
- 6 Moving and travel expense allowance.

Boeing's immediate needs call for experienced and junior aeronautical, mechanical, electrical, electronics, civil, acoustical and weights engineers for design and research; for servomechanism designers and analysts; and for physicists and mathematicians with advanced degrees.

At an International advertising conference in London last week, British Adman J. B. Nicholas offered his views on sex appeal in advertising. Said he: "Sex appeal in advertising. Said he: "Sex appeal consumer and the said of the said o

PUBLISHING

Battle of the Booksellers

After burying its nose in the book publishing business for more than a year, the Federal Trade Commission leaned back and issued a complaint last week that was a bestseller along U.S. Publisher's Row. The Commission charged that Doubleday & Co., and five other publishers' violated book clubts to sell their books at cut-rate prices, while retailers were required to sell the same titles at fixed prices.

The FTC action was a victory for the 3,000 U.S. booksellers, who have been fighting a guerilla war with the book clubs ever since Harry Scherman founded the Book-of-the-Month Club 25 years ago, brought cut nates and mass merchandising to the book business as well as scores of initiators. Book-of-the-Month Club leases printing plates from publishers, pays them 10% of the selling price of sell regular trade copies by as much as 40%, but the clubs give away many free books as "dividends." Under the Courter, To fight the clubs,

Under the Counter, Io nght the cluns, many retailers shoved the regular trade editions of book club selections under the counter, refused to recommend them to their customers. Others, like Manhattan's hig Brentano's bookstore, signed up clerks as Book-of-the-Month Club members, then peddled their books to customers at regular retail prices.

But the clubs prospered. By 1950, there were 60 book clubs in the U.S., with a \$100 million income, about 30% of all U.S. book sales. With 2.5 million members

* The others: Harper & Brothers; Houghton Mifflin Co.; Little, Brown & Co.; Random House; Simon & Schuster.

BOOK CLUBMAN SCHERMAN

A bestseller made bad reading.

on their rolls, the clubs say that they have rerated a brand-new reading public. Says Books-of-the-Month's Scherman: "The reall bookstore—as a method of distribution in the U.S.—does not begin to do. a through job." The clubs depend on the nations 44 2000 post offices for distributions of the contract of the contract of the united to, open, which have few bookstories. Many a publisher reckons that book club and other reprint rights and sales to Hollywood are the only things that keep him in business.

The Same Terms, Book stores charge that cut-rate book club competition helped depress retail sales to \$250 million for the last four years, while rising costs have squeezed store profits to \$2 of 1%. The book stores' solution: force publishers to lease their plates to retailers on the same terms they give book clubs.

The publishers insist they have always

The publishers insist they have always been willing to do this. Said Doubleday President Douglas M. Black: "Any retailer that will bid and pay can lease plates. If any bookseller wants to start a book club there's nothing to stop him."

AVIATION

Trouble for United

United Air Lines this week was forced to ground it is sir DC-68s, the line's biggest and fastest planes, and lop 9,000 miles off its normal 188,000 miles of flying schedules. Reason: the pilots would not fly them unless they got extra pay for the job, day strike against United last month (Trust, July 2), popped up again in mediation conferences. The Air Line Pilots Association, said United had agreed to discuss the question of higher wages for flying the line charged. ALP-A. refused to talk things out. The pilots' union had nothing to say.

Fuel is pumped through "flying boom" into Stratojet from Stratofreighter tanker plane at high altitude,

Connected for "Long Distance"

"Impossible" a few months ago routine today.

That's the story of how Boeing, working closely with the U. S. Air Force, has perfected a mid-air refueling technique capable of serving bombers and fighters—greatly extending their range and effectiveness.

Already, mid-air refueling equipment is standard on the B-50 Superfortress and the 600-mile-an-hour B-47 Stratojet bomber. Successful tests have also been made with Uncle Sam's high-speed jet fighters.

Two Boeing developments make possible fast, safe, mid-air refueling. One is the ingenious "flying boom"—a telescoping pipe from the tanker plane through which fuel is pumped into the receiver ship.

The second development is the KC-97A Stratofreighter tanker which can rendezvous at high altitudes with the B-47 Stratojet — or jet fighters and transfer large quantities of fuel very quickly.

Advances like these explain why Beeing airplanes continue to grow, not only in speed and striking power but also in range, long after they leave the production line. They help keep America out in front in the world parade of airpower.

For the Air Force, Boeing builds the B-47 Stratejets, B-50 Superfortresses and C-57 Stratefreighters; and for the world's leading airlines Boeing has built fleets of the new twin-deck Stratocruisers.

CINEMA

The Palpitating Paganini?

In 10 weeks at Manhattan's Radio City Music Hall, M-G-M's The Great Caruso has grossed a record \$1,500,000. Last week independent producer-director William Dieterle announced plans for a new film of

his own, The Glorious Wagner. Next . . . Battle of Wonderland II

"This sort of competition should be encouraged rather than suppressed," With that comment, a Manhattan federal judge last week turned thumbs down on Walt Disney's effort to protect his forthcoming full-length Alice in Wonderland by staving off U.S. exhibition of Producer Lou Bunin's French-made version of Alice (TIME, July 16). Still muttering darkly of "deception," Disney announced plans for an appeal and put out pointed ads to hawk his Alice's Aug. 1 première: "There is only ONE Walt Disney! There is only ONE Walt Disney's Alice!

What the Public Wants

Hollywood showmen, always sniffing the shifting winds of popular favor, had a chance last week to savor a steady breeze. It came from a 33-city survey by Independent Producer William Pine, specialist, with his partner William Thomas, in trying to give the public what it wants. Pine & Thomas, proud to be known as "the Dollar Bills." have made money on 63 of their 64 pictures. On the theory that exhibitors are the best guides to public taste, they make an annual junket to sound the theater men out. After listening to them this season. Pine reported: "The public is tired of pictures about

the Civil War or any other war . . . It wants fresh locales and fresh faces. People are tired of straight dramatic actors trying to be comedians, and sick of the same old tired stars playing youngsters half their ages. Color is a star on the marquee: the public loves it. It wants pictures that move, not talk. It wants science fiction, But it also wants pictures about people who are not afraid to say they believe in God, because people want to believe in God themselves these days. It doesn't, however, want dull pictures about religious themes. One more picture like The Next Voice You Hear, and even God will he out of business.

"The public wants pictures about kids and animals. It wants outdoor dramas. And it wants action stories . . . There is tremendous interest in Indians now. Exhibitors say: 'Give us Indians!' And the public wants titles. Titles wake up their imagination. I can sell pictures by calling off titles to exhibitors. A title like Hong Kong will sell sight unseen."

Hard Work

The zany comic team of Dean Martin. 34, and Jerry Lewis. 25, has worked hard to get ahead in its five-year career in nightclubs, radio & TV and movies (TIME. May 23, 1040), Last week, in a personal

appearance at Manhattan's Paramount Theater, the boys worked harder than ever. They played to packed houses six times a day, seven times on Saturday, and followed almost every appearance with an extra three minutes of clowning at their dressing-room window overlooking 44th Street-a methodical bit of madness designed to lure overloval fans out of the Paramount's seats so that others could buy their way into them.

After seven days, with another week still to go, Martin & Lewis had outdrawn

LEWIS & MARTIN Oh, how the money rolls in.

such favorites as Bob Hope and Frank Sinatra to break the Paramount's record for weekly receipts. The new mark: \$150 .ooo. Counting up their own take (50% of the gross, minus salaries for an orchestra and supporting players), the comics found that their hard work had paid them the highest one-week salary in the history of show business: \$64,000.

The New Pictures

Strictly Dishonorable (M-G-M) shows how persistent Hollywood can be. The picture is the second movie version of Preston Sturges' 1929 Broadway hit; it is also M-G-M's second attempt to capture Ezio (South Pacific) Pinza's middle-aged sex appeal on film.*

This adaptation does tolerably well by wright Sturges' comedy. The original play told a simple, incongruously funny story about a young and fairly innocent Southern girl who tries to seduce a rakish Italian opera star; he turns out to be such a sentimentalist that he marries her. The

* The first attempt: Mr. Imperium, which has been put into cold storage in the hope that the

How the Chemical Fibers

Came to the Rescue of the Rug Industry!

Hardly anyone needs to be reminded of the scarcity or the high price of many types of wool

Yet, despite this world-wide shortage, the rug industry, today, is maintaining a high rate of production. What's more, their present prodnets- and their products of the future—will have definite advantages over the old... including a lower price.

The explanation for this seeming paradox lie in the fact that at Celanese work on special chemical fibers for range was begun fifteen years ago. Sample after sample was made, extending into the thousands. Hundreds of trials with cooperating mills preceded the scores of experimental range which were produced. Some of these were failures, some were good, some were executed.

lent—"just the thing." And through it all came industrial know-how.

Celanese, as a producer of basic chemical fibers and chemicals for a wide range of different industries, believes it is its function not only to meet industry's needs—but where possible to anticipate them.

This is the kind of forward thinking that makes the future of a company—an industry—or a country—secure.

that have not missed

a Dividend in 25 Years

UNITED'S Annual Report covering every stock on the New York Stock Exchange and Curb that has paid dividends without a break for 25 to 167 years, is just off the press. This list of dependable dividend-payers includes 98 stocks that have paid dividends for 50 years, 12 for 100 years, and one that has not missed an annual payment in 167 years.

MANY SOUND ISSUES YIELD 7% TO 8%

Consider the income return from these sound stocks contrasted with interest on best bonds (3½%) and bank deposits (2%). There are 102 stocks yielding 6%-8%. Investors willing to take a "business man's risk" will find 48 long-time dividend payers yielding 8%-15.6%.

This exclusive list—representing as it does some of the most successful concerns in American industry—will interest those seeking higher return on their capital as well as the inflation protection usually afforded by time-tested common stocks.

this is no time to be without

 o for TIME's special help in understanding the news as it happens all over the world, as it affects our homes, our cities, our economy, our government film all but smothers the idea with plot complications, cooking up elaborate reasons for the marriage—in name only—to come first. So that the pair can pursue their dalliance and yet stay strictly honorable under the technical rules of the cinema code. Irrelevantly, one of the film's best moments comes in a movie-house sequence showing climpses of Greta Garbo in 1929's A Woman of Affairs. In 1929's A Woman of Affairs.

Janet Leigh is engaging as the Southern belle who takes up with a courtly rake in a Manhattan speakeasy. Actor Pinza, 95, whose close-up profile occasionally resembles Douglas MacArthur's, carries off his role with vigorous charm, and takes full advantage of his cues for a few operatic bits (the hest: Song of the Golden Call,

Leigh & Pinza
Dalliance—in name only.

from Faust), and two old popular tunes (Fill See You in My Dreams, Everything I Have Is Yours). If his style is a shade heavy for deft comedy, it is certainly no heavier than the script.

Toko Core of My Little Gid (20th Centruy-Fos), based on Peggy Goodin's 1950 novel, tilts at the evils of the U.S. college sorotity system. Even before the film was made, het-up sorotity sisters based in like fruit growers protesting are likely to find it a firr enumen inflient entire of the abuses of Greek-letter societies. They are less likely to get as worked up over the problem as the picture does.

At length and in Technicolor, the film shows that sometities have their points, e.g., a coay sense of belonging, but none to offset the but they inflict on the girls they turn down, or to justify the smobbish values they set up. It pictures the societies through the bright eyes of Freshman Jeanne Crain, who comes to a Midwestern university. all atwitter to join Upsilon Upsilon Ursilon

As a pledge, Jeanne has just what the

soroity wants: good looks, clothes, social poiss, a well-to-do father, and a mother who was a Tri U herself and has never who was a Tri U herself and has never forgotten it. In the end, Jennes, after seeing how Tri U snubs "social inferiors," is dissenkanted enough to turn in her her before the social inferiors, the side seed of the social point of the social poin

The treatment of Tri U's tribal customs and cruelties is competent, though overdrawn. It gives the sisters a hard time, while taking too tolerant a view of the system's true culprits: the parents who let them grow up that way.

The Prince Who Was a Thief [Universol-international] is the kind of frotby, non-alcoholic, Arabian-nights cocktail that Hollywood has shaken up a thousand and one times. Brusque handclaps still bring on the harem dancing zirls; Tangier bristles with flashing scimilars, wicked potentates, skulking culpurses, rococo palaces and phrases.

Through it all, leaping, swimming, scaling walls and trailing broken hearts'flashes "Desired of Damsels" Tony Curris, born to the purple but kidnaped and reared as a thief. With the help of an impish girl thief (Piper Laurie), who can wriggle through the treasury's barred window, Tony outfoxes and outfights the usurper to win back his rightful place.

The movie is energetically played, wellpaced by Director Rudolph Maté, occasionally touched with humor and quite free of pretensions. It should delight youngsters without irritating the grownups who go along for the air conditioning.

CURRENT & CHOICE

Strangers on a Train. Alfred Hitchcock's implausible but dazzlingly tricky thriller about a psychopath (Robert Walker) with a new scheme for foolproof murder (Time, July 16).

The Frogmen. How the Navy's underwater demolition teams cleared invasion beaches in World War II; with Richard Widmark, Dana Andrews, Gary Merrill

(TIME, July 9).

Four in a Jeep. The timely story of a four-power MP patrol in Vienna, split by the plight of a Viennese girl in trouble with the Soviet command: with Viveca Lindfors, Ralph Meeker (Time, June 18).

Oliver Twist. Director David (Great Expectations) Lean's brilliant adaptation of the Charles Dickens novel; with Alec Guinness, John Howard Davies, Robert Newton (TIME, May 14).

On the Riviera, Danny Kaye plays a double role in a cinemusical whose laughs, songs and dances sparkle as brightly as its Technicolor (Time, May 7).

Fother's Little Dividend. In a lively sequel to the original Spencer Tracy-Joan Bennett-Elizabeth Taylor comedy, the Father of the Bride becomes a grandfather (TIME, April 23).

Kon-Tiki. An engrossing documentary record of how six men floated 4,300 miles from Peru to Polynesia on a raft (Time, April 16).

BOOKS

Problem Packet

THE DIVIDING STREAM (312 pp.)— Francis King—Morrow (\$3).

At heart, Karen hated men, Men should be strong, brave, austere; yet her crippled professor father had cringed before pain, screaming shrilly on his deathbed: "I won't die, I won't, I won't." From that frightening experience, the pale English girl fashions her own neurotic design for loving—"to humiliate or be humiliated."

When Max Westfield comes along, she marries him—mainly for his money. Max, a widower, is an easygoing, openhearted American, born to be humiliated. While he is at war, she has an affair with another man and bears him a child. Deeply hurt, Max nevertheless accepts the child as his own.

For the next half dozen years, Karen behaves herself, bursting into prissy tantrums only when Max's doslike devotion takes a forthright bushandly turn: "No, please don't. If it's not... mental mail-ga and messing about, it has to be the other kind." At a point where friends might have recommended a good psycho-analyst, Max packs the family off for a long holiday in Florence.

The warm Italian sun and scene stir up fresh trouble. Karen promptly finds a lean, bronzed soldier-adventurer type who has modeled himself on T. E. Lawrence. They run off together, but Karen soon cloys his palate. Long-suffering Max takes her back again.

In plot, The Dividing Stream adds up to little more than an emotional tempest in a cracked teacup. Atmospherically, English Novelist Francis King, 28, does better. In dozens of pungent little Florentine

SKIPPER KERANS
"Have rejoined the fleet."

H.M.S. AMETHYST AT HONG KONG "Splice the main brace,"

sketches, ranging from cynical policemen to bent-double washerwomen, he evokes the passion and poverty of the people. Most memorable: two scrubby street urchins who think and move with a netless, pagan ease which suggests that the good life, and not a twisted packet of "problems," is man's rightful heritage.

Ordeal on the River

YANGTSE INCIDENT (240 pp.)—Law-rence Earl—Knopf (\$3).

A stranger on the docks of Hong Kong might have wondered what all the fuss was about. It was only the little British frigate Amethyst, 1.470 tons, and looking a bit shabby at that. But as she hove into view that August day of 1949, the din of sirens, fireworks and lusty British cheers was a considered tribute. In spite of the heavy rain, a squadron of Spitfires repeatedly swooped low in salute. Only as the Amethyst peared her Royal Navy berth did it become plain that she was a shelled cripple. No sooner was she tied up than her whole crew was relieved, to become the week-long guests of the Fleet Club. From England, King George personally ordered an extra round of grog for all hands with the time-honored phrase: "Splice the main brace,"

No sailorman's drink was ever more fairly earned. On April 20 the Amethyst had been steaming up the Yangtse River on a routine mission to Nanking. On the left bank lay the retreating Nationalist army; on the right the Communists were poised for an assault crossing, Suddenly, about 125 miles upriver, some 75 miles from Nanking, the Communists opened up with artillery, fired twelve rounds and scored twelve misses. Fifty minutes later, ignoring Union Jacks unfurled over the side, another and more accurate shore battery scored 53 hits on the Amethyst. Dead and wounded lay scattered about her deck. The ship's doctor was killed, the skipper was wounded and soon died, and most of the guns were put out of action. The Communists answered the Amethyst's white flag of truce with machine-gun fire. The smashed frigate ran aground on a mudbank, remained trapped under Communist guns for 101 days.

The Price of Freedom, Canadian Journalist Lawrence Earl rettells H.M.S. Amethyst's story (Thate, May 2, Aug. 8, 1949) with measured understatement. But what with measured understatement. But what the state of the

The Communists promised not to reopen fire so long as the ship stayed where she was anchored. From her new skipper, Lieut, Commander John Simon Kerans, who came down from the embassy at Nanking, they demanded an admission that the Amethyst had provoked the attack, This was to be the price of freedom, set and maintained in eleven frustrating, teadrinking sessions. Kerans refused to pay, The steel ship became a furnace, as fuel ran low and the ventilators had to be shut off. As the carefully measured food ran out, the crew went on half rations. To Skipper Kerans it seemed plain that the Communists were trying to starve him into an admission of guilt,

For once the British Navy was powerless; three warships that had tried to rescue the Amethyst had been turned back severely damaged.

Then came the Amelpyt's break. In answer to Krann' pleas, the Communists delivered 56 tons of fuel oil to operate the refrigerators and ventilators. The 56 tons, Kerans figured, gave him just enough to reach the open ase. He decided to run for it. Luckily the Yangtse was in high water, but even so, the tortoous sitted channel was a skipper's nightmare—especially without an experienced Chinese pilot. And

STEEL..

MADE WITH BRICK

- When you heat steel to the point where you
 can pour it like water, what kind of a container
 can you keep it in? Obviously not a steel one,
 for it would melt along with its contents. The
 answer is a furnace lined with brick...refractory brick.
- Wherever there's fire you need refractory brick, including the oil burner in your basement and the fireplace in your living room. Without it there would be no modern industry. No steek, copper, brass, aluminum; no glass, chemicals or electric power; no shoes or processed foods, and no way of transporting them.

even if Kerans had the luck to stick to the channel while ducking Communist artillery, there was still a boom of sunken ships to pass so miles downviver.

to pass, 40 miles downriver. 'God Save the King." A little after 10 p.m., July 30, Kerans ordered "Slip cable!" Minutes later his ship was on her way. Soon after, the Communists guns opened up and Kerans felt a shell whoosh past his neck, but the Amethyst was untouched. Then she began to flood from a waterline shell hole suffered in the first day's attack. In the engineroom the depleted crew of eleven worked at temperatures up to 170 degrees, drank ten gallons of tea during the frantic run. In the chartroom, two men tried to pick out the channel with an echo sounder. One thing was sure: the Amethyst had to hit the narrow opening in the boom or "she would slice off her bottom." As she approached it, a flare went up, Communist guns opened fire and the river erupted in waterspouts. Kerans saw a single light on the boom and prayerfully made a blind guess: "Steer just to port of the light," And the Amethyst went through without scraping her

Only once did the Amethyst get into dangerously shallow water. Below the boom, she met a patrol boat; Keran de-cided to speed by as close as possible, thus give the smaller enemy craft a minimum temped by with a bare 15 inches to spare, the speed of th

Kerans radioed a message to his commander in chief: "Have rejoined the fleet. Am south of Woosung. No damage or casualties. God save the King."

Thar She Used to Blow

SAILS AND WHALES (232 pp.)—Captain H. A. Chippendale—Houghton Mifflin (\$3).

Did you ever hear the tale of the mighty sperm whale

That when boldly attacked in his lair With one sweep of his mighty and ponderous tail

Sends the whaleboat so high in the air?

If not, it might be a good idea to get a copy of Captain Harry Allen Chippen-dale's Sails and Whates. Captain Chippen-dale's Sails and Whates. Captain Chippen-dale, 73, is one of the last men left alive largest of God's creatures over the bounding main in an oversite peasod, and did him in with a spike on the end of a pole. His memoir of those derring days, told with safty gueto, is aure to be one of the control of the con

Fate signed Harry Chippendale aboard his first whaler. He was born in the cabin of his father's ship, two days off St. Helena, a great rendezvous of the whaling trade, where Harry's father later served as U.S. consul.

At 16, he was ready to go to sea in carnest. He knew the "riggin" and runnin' gear" as well as the alphabet, but life on a whaler held odd surprises for him. The oddest: having to douse his clothes in urine, the standard detergent aboard the oily whalers, before washing them in sea water.

The first few kills of Harry's career were easy ones, but one day a wounded whale charged his dory and sent him swimming for his life through a sea full of sharks. Another time, his broken boat was kept affoat like a surfboard as the whale dragged it along at top speed at the end of a harpsoon line. On a third occasion, young Harry was bounced overboard into a

SKIPPER CHIPPENDALE
He was the soccer ball.

school of whales, which amused themselves by playing a none-too-gentle form of soccer with Harry as the ball.

On shore, the young tar had a rather quieter time. He once went hard-ale for a pretty little Portuguese, and had to do some tricky navigation to get out of port; but in general, says the prim old sea dog, "I always kept a straight course and gave them a wide berth, as I had no use for painted-faced daisies."

At the turn of the century, the old-style whalers were foundering to their finish, to be replaced by modern floating whalesoft factories. Harry became a landsman, and took up plannacy. He went back to the sea in two World Wars, served as skipper of troop ships and cargo ships, "Blut who can find romance," he sneers, "in an engine thump?"—especially while

The rare old whale, mid storm and gale
In his ocean home will be,

A giant in might, where might is right, And king of the boundless sea.

Cool as a ----

It costs far less than you think to work refreshed and

Cucumber of course!

That's how you'll feel this summer with a Philco Air Conditioner in your office!

THIS crisp, fresh cucumber should suggest exactly how cool and comfortable you can be this summer with a Philco Air Conditioner in your office —or your home for that matter.

For Phileo Air Conditioners give you real air conditioning. They cool the air, dehumidify and circulate it. They bring in fresh air from outside and filter it (furnishings stay fresher, last longer). They remove stale indoor air. They are quiet, vibrationless, efficient. And you'll be surprised how little they cost.

Just think back to those muggy, hot, disagreeable days last summer—and call your Phileo dealer today. He's listed in your phone book.

PHILCO WINDOW AIR CONDITIONERS with 15 or 15 hp. Scaled Power Systems, for rooms up to 250 or 430 square feet in floor area, from \$359.951. Cleanly and simply styled; fits into any home or office window. Ivory or two-tome tan.

PHICO CONSOLE Model 100-GC for rooms or offices up to 550 square feet. Decorator styled in dark walnut veneers. I have quet and vibrationiless. \$685.00.\(^1\). Also a 2 h.p. water-covided console for stores or rooms up to 1500 square feet.

The Zone 1. Prices subject to change without notice.

Old Jawbreaker

RABELAIS (424 pp.)-John Cowper Powys-Philosophical (\$3.75). THE LAUGHING PHILOSOPHER (206 pp.)-M. P. Willcocks-Macmillan (\$3,75),

François Rabelais warned his readers to be careful with Gargantua and Pantagruel. "Following the dog's example," he told them, "you will have to be wise in sniffing, smelling, and estimating these fine and meaty books: swiftness in the is called for; after which, by careful reading and frequent meditation, you should break the bone and suck the substantific marrow.

Rabelais had his tongue in his cheek as usual-yet as usual his enunciation of the home truth was unimpaired. To get the marrow out of the masterpiece, it is pretty necessary to follow the dog's example, and in modern times, rather few readers, all in all, have cared to exert enough jaw for that. Rabelais has been put aside. largely untasted, on the snap judgment that he is, as Voltaire said, a "drunken philosopher" who wrote "an extravagant and unintelligent book . . . prodigal of erudition, ordures and boredom." The The book which Rabelais merrily dedicated to "Drinkers and . . . Syphilitics" has become the property of prurients and scholars.

Two studies of Rabelais, published almost simultaneously, come as a periodic reminder of a writer who was surpassed in his age only by Shakespeare and Cervantes. Rabelais, by ancient (78) English Novelist-Essayist John Cowper Powys, enfolds the jolly old cleric in a loose shirt of verbiage that he would surely have found too hairy for comfort; The Laughing Philosopher, by M. P. Willcocks, sometimes muffles the Rabelaisian laughter in a modesty he certainly never felt. Yet both books bring back a strong, winey breath of the most exuberant of writers from Aristophanes to Balzac; a man who drank life to the drains, and then couldn't deny himself the loudest belch in litera-

Forbidden Texts. François Rabelais son of a country lawyer. He was placed, in early youth, as a novice in a Franciscan monastery, and later he was ordained a priest. A crack student, François soon got his hands on some forbidden Greek texts. Enraged, the good brothers snatched his books away. Outraged, François pulled strings and had himself transferred to the cultured Benedictines, who encouraged the study of Greek.

Yet not long after, François impulsively doffed his Benedictine habit, and went absent without leave on a grand tour of the French universities. He became first a theologian, then a lawyer, then a doctor-in all, one of the most erudite men of his age. He was almost 40 when he began writing his tales of Garwriting, but partly for need of money,

The book was an instant bestseller: its

FOR THE I MAN IN 7 WHO SHAVES DAILY

New preparation has remarkable skin-soothing ingredient

Modern Living demands you shave every day. But your skin need not get irritated, rough, and often old-looking. Not any more . . .

Two special ingredients in Glider rushless shave cream correct all this. One is the same type of oil that is used on a baby's skin. This allows your razor to cut close without

The second ingredient which insures your skin new shaving comfort IS EXTRACT OF LANGLIN-8 wonderful new substance with beneficial ingredients 25 times as active as in plain lanolin, the well-known skin conditioner.

Glider for the brushless shaverwhether you shave daily or less often -means a comfortable, clean shave. And for the man who must shave twice a day, it's a life-saver! It keeps skin silky-smooth, because it's a shaving preparation that's good for the skin. So good that it makes aftershave lotions needless. All you need do is rub a little extra Glider right into your skin . . . and like a skin cream it replenishes the oils of your skin, leaves your face feeling smooth. relaxed with that healthy look of youth everybody admires.

As makers of fine shaving preparations for over 100 years, and as makers of the only shaving preparations containing EXTRACT OF LANOLIN. we know there's not a better brushless preparation on the market, Get a tube today, and see for yourself. FRANÇOIS RABELAIS
AWOL.

ribald irreverence made Rabelais famous to the laity, infamous to the clergy. It did not help his case that he was a lapsed monk, and the known father of a bastard. The rest of his life (he lived to be close to 60) was spent under the continual threat of the Inquisitional stake.

Oracle of the Bortle, Ilis Gorgantus and Pantagenei is the history of a dynasty of easyoning giants. At Cargantus's birth (from his mother's left ear), 17-913 cows were required for his feeding. Pantagruel, his son, needed only 4,600 cows, but he was so vigorous that he ate one of the cows, and had to be bound in his crib with the chain later used for young Lawrence and the chain later used for young Lawrence gravel goes to Paris, he meets Panurge, a gay dog who knows 65 ways to make money and 214 to spend it.

Panuge has a flea in his ear who keeps suggesting that he get married. With Pantagruel and a bawdy monk named Friar John of the Funnels, Panuge sets out for India to consult the Oracle of the Holy Bottle on the matter. On the way they encounter a race of people whose moses are formed like the ace of clubs, and a nation that eats & drinks nothing but wind.

All state they reach the Holy Bottle, and Panurge puts his question. The Bottle reptiles, "Their let mean, "Dink!" And here they have present the mean, "Dink!" And here they have present the mean, "Dink!" And here they have present the symbolic language, offers his top of life to whoever has the taste for it: "We hold not that laughing, but that drinking is the distinguishing character of man." Panurge interprets the oracle to man." Panurge interprets the oracle to man that he should take whatever cup life offers him, and drinks it down with a will.

That was Rabelais' way, in death as in life. He expressed the whole philosophy of it in the famous last words ascribed to him: "I go to seek a great perhaps."

MISCELLANY

Hey, Rube! In Palisades Amusement Park, N.J., after he had paid off ten kewpie dolls, four Teddy bears and a set of china to a wondrously successful dart thrower, Concessionaire Joe Weissman investigated, found the marksman's confederate behind the backdrop with a long hatpin.

Boxing the Compuss. In Baltimore, after a judge told three brawlers he would dismiss charges if they got out of town, Defendant North went west, Easterly headed south, but Southern paid his fine and stayed.

Careless Love. In Bogotá, Colombia, Matilde Ramirez applied for a marriage license and learned that she was already legally married because her ex-fiancé, using their previous license to marry another girl, had not bothered to change the names.

Taste Tells, In a San Mateo, Calif. saloon, Steelworker Gus Erickson, who had cigarettes in one pocket and firecrackers in another, absent-mindedly reached for a smoke, got the wrong pocket, lit up.

Beef Rollback. In Mount Gambier, Australia, Grandfather George Uphill, 60, attacked by a 900-lb. bull, took it by the horns and broke its neck.

Poor Reception. In Memphis, Tenn., Peggy Roberson won a divorce after telling the court that when she inadvertently blocked her husband's view of the TV screen, he "threw a chair across the room, struck me, pulled me into the bathroom and held my head under water."

Return to Sender. In Newport News, Va., Postmaster Bob Cutler admitted that he was not eligible to play in the Virginia State Amateur Golf Championship: his official entry was postmarked too late.

100% Exemption. In Mount Vernon, Ind., after reading an advertisement offering \$10 off the price of a used car for each child of the purchaser, Typesetter Wilfred Clark picked out a \$100 Pontiac, marched his ten children past the dealer, drove away with a bill of sale.

The Urban Urge. In Denver, after a new deer enclosure had been built in the city park 200, a two-year-old buck wandered into town, jumped the seven-foot fence, and joined up.

Mission Accomplished. In Madison, Ns., after cardsharps had clipped him for §48, a wrist watch and a cigarette lighter, Corporal John Ramzy told the judge that he had come to town to check on reports that gamblers were fleecing servicemen.

Operatic Touch. Near Nishnabotna, Mo., Tippler Clarence Carmen was arrested for shooting up a meeting of the local chapter of Alcoholics Anonymous.
